General Information

Overview

Financial Statement Analysis is a capstone unit within the Bachelor of Accounting course. It supports you to integrate your learning in the course and to critically examine accounting and finance concepts relevant to the analysis of financial statements. You will apply these concepts to the analysis of real firms. The focus of the unit is on analysing financial statements to better understand and interpret the economic and business realities of firms. In particular, you will learn how to use financial statements to identify what adds value. While recognising that adding value can be viewed from the perspective of a range of different stakeholders, you will focus on the interests of equity investors.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback

Feedback

It would be great if Zoom workshops could provide more opportunities for students to ask questions, particularly in relation to the assignments.

Recommendation

The Zoom workshops will be focused more on providing support to students to ask questions about concepts we are studying, and in particular to ask questions about the assignments and to discuss and work through their assignments using their company.

Feedback from Student feedback

Feedback

It would be great if various short videos focused on different concepts could be incorporated and discussed in the Video lectures.

Recommendation

The short videos available in the unit will be integrated more into the Video lectures.
