General Information

Overview

In this unit, you will examine the professional environment of the auditor, particularly audit standards, audit practice, legal liability, ethics and current developments (e.g., Audit Expectation Gap). Audit methodology and planning, internal control assessments and exposure to influences of information technology on audit testing will also be examined. The unit material, while drawing on audit theory, is very practically based for the needs of future audit professionals. Statistical and non-statistical audit sampling is also covered in detail. With an emphasis on professional and ethical practice, you will gain an appreciation of the role and needs of audit professionals in business environments.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student evaluation

Feedback

Challenges in group assignment including finding the group members and allocations of workload

Recommendation

1. To support better team collaboration and communication, the group size has been reduced from three to two students. This adjustment aims to make it easier for students to manage progress and maintain effective communication within their teams. 2. Students are encouraged to begin looking for a teammate early in the term. This allows sufficient time to get to know each other and determine whether they can work well together as a team.
