## General Information

### Overview

Accountants are increasingly expected to be competent in their understanding of complex business processes and information systems used in organisations. This unit will provide you with the essential skills and knowledge needed to understand and use such Accounting Information Systems throughout your career. You will develop knowledge in accounting systems and business processes, basic system documentation tools, database management, fraud and other threats, as well as appropriate internal controls. You will also investigate and study technological developments in areas such as transaction processing, visualisation methods and business intelligence. Finally, you will develop technical competence in productivity software, such as spreadsheets, visualisation tools and accounting software.

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Informal conversations with students.

##### **Feedback**

Students appreciated the applied nature of the unit and the use of software to teach accounting concepts which are relevant to their careers.

##### **Recommendation**

Computer workshops have been embedded in the delivery model and will continue to be offered. They will be regularly updated to ensure that they remain relevant.

#### Feedback from Student feedback.

##### **Feedback**

Some students found that some of the SAP workshops were too long.

##### **Recommendation**

One hour is allocated to completing the practical work. Tasks not completed in class are given as homework. However, in future terms, the UC will be cognisant of time and pace the practical workshops accordingly.
