General Information

Overview

Accountants are increasingly expected to be competent in their understanding of complex business processes and information systems used in organisations. This unit will provide you with the essential skills and knowledge needed to understand and use such Accounting Information Systems throughout your career. You will develop knowledge in accounting systems and business processes, basic system documentation tools, database management, fraud and other threats, as well as appropriate internal controls. You will also investigate and study technological developments in areas such as transaction processing, visualisation methods and business intelligence. Finally, you will develop technical competence in productivity software, such as spreadsheets, visualisation tools and accounting software.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE comments

Feedback

Some students mentioned that some questions were not from the lecture slides.

Recommendation

Clearly inform students that they need to supplement lecture content with readings from the related chapters in the prescribed textbook.

Feedback from SUTE comments

Feedback

Some students were not happy with the management of the unit, e.g availability of recordings, timeous provision of feedback

Recommendation

Unit was taught by a sessional lecturer. Going forward this unit is being taught by a full time staff member and such administration issues will not occur.
