AVAT12010 Commercial Pilot Licence Flight Planning

Term 2 - 2023

Profile information current as at 05/06/2023 09:21 pm

All details in this unit profile for AVAT12010 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will provide you with the knowledge required to plan a Visual Flight Rules (VFR) flight in a small commercial aircraft. You will learn how to interpret small commercial aircraft performance data. From meteorological forecasts, you will determine the appropriate route, altitude, and alternate aerodromes. You will also learn how to conduct a weight and balance assessment for a flight.

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 12-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 25 hours of study per week, making a total of 300 hours for the unit.

2. **Examination**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit Evaluation Recommendation

Feedback

Assessments are too complex

Recommendation

The assessment structure and the assessment problems should be reviewed.

Feedback from Unit Evaluation Recommendation

Feedback

Lecture delivery needs improvement

Recommendation

The lecture delivery strategy should be reviewed to make the delivery more interesting and interactive.

Feedback from Unit Evaluation Recommendation

Feedback

Assessment feedback is not adequate

Recommendation

The marking rubric should be updated and a new method to provide individual assessment feedback should be developed.

Feedback from Unit Evaluation Recommendation

Feedback

Learning resources need improvement

Recommendation

New self-learning material should be developed to better explain some of the complex topics covered in the unit.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Interpret small commercial aircraft performance data
2. Critically analyse appropriate route, altitude, and aerodromes using forecast meteorological conditions
3. Calculate weight and balance and prepare a load sheet for a small commercial aircraft
4. Prepare a small commercial aircraft Visual Flight Rules (VFR) flight plan, including navigation plan and fuel plan
5. Exercise judgement in the flight planning process for small commercial aircraft.
