General Information

Overview

In Construction Risk Management you will learn the construction-specific nuances of risk management. You will also learn why standard insurance programs have unique implications for contractors and how to evaluate effective strategies for managing construction risks. Viewed through the lens of the construction risk and insurance framework, this unit provides you with an understanding of the strategies for mitigating, transferring, and insuring construction risks. You will learn how risks are commonly allocated in a construction project and how to identify variances between a contractor's insurance coverage and the total project risks. You will gain the knowledge to monitor and identify statutory changes and judicial rulings that impact the contractor's liabilities as well as the coverage they have in place to mitigate potential liabilities.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

The marking was done by a teacher that did not conduct our lectures, which in my opinion, created a list of expectations that this teacher had that we were not aware of regarding Assessment 1.

Recommendation

Regardless of who marks the assessments, we will ensure strict adherence to the marking rubric and conduct moderation to maintain consistency and fairness across all submissions.

Feedback from SUTE

Feedback

Some students experienced a different teaching style from their home country and found it really beneficial.

Recommendation

We will continue to incorporate diverse teaching approaches and examples from different educational contexts to enrich learning experiences.
