

BMSC11002 *Human Body Systems 2*

Term 1 - 2018

Profile information current as at 19/08/2022 06:04 pm

All details in this unit profile for BMSC11002 have been officially approved by CQU University and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will study the anatomy and physiology of the sensory, lymphatic, immune, endocrine, respiratory, cardiovascular, digestive, renal/urinary, and reproductive systems (of the human body). Further, you will also study the physiological regulation of these body systems, as well as their integrated role in the maintenance of health and/or development of disease.

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Have your say feedback

Feedback

Students found access to practice quizzes helpful

Recommendation

These quizzes will continue to be offered to student in order to help pace their learning. Additional activities are being developed to aid students understanding of difficult concepts.

Feedback from Student communication and Have your say feedback

Feedback

Access to prerecorded lectures

Recommendation

Many students appreciated having all the terms lectures made available at the start of term as this helped them to pace their own learning around their other commitments. The lectures will be updated and rerecorded over the coming year to ensure that students have access to the highest quality of lecture recordings.

Feedback from Student communication

Feedback

Some students feel that there is too much content

Recommendation

This is a very content heavy unit. Students are presented with a large amount of content each week. The teaching team continues to work closely with lecturers in other course areas to ensure that all cohorts of students are taught that is appropriate to their chosen discipline.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Discuss the principal structural features of the human body as they pertain to the sensory, lymphatic, immune, endocrine, respiratory, cardiovascular, digestive, renal/urinary, and reproductive systems.
2. Discuss the role and the physiological regulation of the of the sensory, lymphatic, immune, endocrine, respiratory, cardiovascular, digestive, renal/urinary, and reproductive systems in the human body.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
