General Information

Overview

Upon successful completion of this unit, you will be able to describe the structural levels of organisation within the body, use anatomical terminology to describe the relative location of structures in the body, and explain the role and general features of homeostasis in the body. You will also gain an understanding of the anatomy and physiology of the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic and immune, respiratory, digestive, urinary, and reproductive human body systems. Your knowledge and skills will be developed through a series of coursework exercises.
