

BMSC11011 Human Anatomy and Physiology 2

Term 2 - 2022

Profile information current as at 28/04/2024 07:04 am

All details in this unit profile for BMSC11011 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Upon successful completion of this unit, you will be able to describe in detail the structural levels of organisation within the body, use medical terminology to describe the relative location of structures in the body, and explain the role and general features of homeostasis in the body. You will also gain a deep understanding of the anatomy and physiology of the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic and immune, respiratory, digestive, urinary, and reproductive human body systems. Your knowledge and skills will be developed through a series of coursework exercises. This unit will build upon knowledge gained during Human Anatomy and Physiology 1. You will be required to have access to a computer to make frequent use of internet resources and to complete assessment tasks.

Details

Career Level: *Undergraduate*

Unit Level: *Level 1*

Credit Points: 6

Student Contribution Band: 9

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Co-requisite: BMSC11010 Human Anatomy and Physiology 1It is strongly recommended that students have enrolled into BMSC11010 Human Anatomy and Physiology 1 in a term prior to their enrolment in BMSC11011 Human Anatomy and Physiology 2

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2022

- Online
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Online Quiz(zes)**

Weighting: 40%

2. **Online Test**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe the structural levels of organisation and anatomical structures using medical terminology
2. Explain the general features and role of homeostasis in the body
3. Describe detailed human anatomical structures within the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic and immune, respiratory, digestive, urinary and reproductive systems
4. Describe the human physiological functions in detail of the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic and immune, respiratory, digestive, urinary and reproductive systems
5. Discuss interactions of structure and function between human body systems
6. Discuss the application of human anatomy and physiology relevant to your discipline.

In courses that are externally accredited, the learning outcomes are linked to the national standards of the respective professional organisation/s.

Schedule

Week 1 - 11 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
The Body as a Whole	Openstax Chapters 1, 2 and 3	

Week 2 - 18 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Integumentary System	Openstax Chapter 5	

Week 3 - 25 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Skeletal System	Openstax Chapters 6, 7 and 8	

Week 4 - 01 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Muscular System	Openstax Chapters 10 and 11	

Week 5 - 08 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Nervous System	Openstax Chapters 13, 14 and 15	

Vacation Week - 15 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 22 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Endocrine System	Openstax Chapter 17	

Week 7 - 29 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Cardiovascular System	Openstax Chapters 18, 19 and 20	

Week 8 - 05 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Lymphatic System and Immunity	Openstax Chapter 21	

Week 9 - 12 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Respiratory System	Openstax Chapter 22	

Week 10 - 19 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Digestive System	Openstax Chapter 23	

Week 11 - 26 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Urinary System	Openstax Chapter 25	

Week 12 - 03 Oct 2022

Module/Topic	Chapter	Events and Submissions/Topic
Reproduction and Development	Openstax Chapter 27	

Review/Exam Week - 10 Oct 2022

Module/Topic	Chapter	Events and Submissions/Topic

Exam Week - 17 Oct 2022

Module/Topic	Chapter	Events and Submissions/Topic

Term Specific Information

Unit coordinator contact details are provided on Moodle.

This free online textbook (<https://openstax.org/details/books/anatomy-and-physiology>) is the only textbook students need for this unit. It will be listed as “prescribed” and is the compulsory text for this unit.

Whereas the Patton textbook (Anatomy and Physiology: Adapted International Edition 9th (2018) Authors: Kevin T. Patton, Gary A. Thibodeau, Andrew Hutton) will be listed as “supplementary”. A supplementary textbook is not compulsory for the unit but adds more information as some students may want to read further.

Students will have free access to Complete Anatomy (<https://3d4medical.com/>) which is an excellent resource. More details about accessing Complete Anatomy will be provided on Moodle.

As per Australian educational standards, you are expected to commit 150 hours of engagement to your study of this unit. A recommended breakdown of study hours is given below:

- 2 - 3 hours per week watching pre-recorded lectures and revising the content through study notes.
- 2 - 3 hours per week completing the weekly study questions and weekly revision quizzes on the unit's Moodle site.
- 2 - 3 hours per week attending the weekly tutorials and reflecting on your answers to the weekly revision worksheets.
- 3 - 4 hours per week preparing for your assessable online quiz and end of term online test.

Assessment Tasks

1 Online Quiz

Assessment Type

Online Quiz(zes)

Task Description**Online Quiz (40% weighting)**

The online quiz assesses content covered during weeks 1-5.

Week 1 - The Body as a Whole
Week 2 - Integumentary System
Week 3 - Skeletal System
Week 4 - Muscular System
Week 5 - Nervous System

Students will have one attempt and a time limit of 90 minutes to complete the online quiz on Moodle in week 6 of term. The opening and closing dates will be provided on Moodle closer to the date to minimise clashes with other units. There is a minimum requirement in the assessment task: 50% of the available marks for this assessment item. In the absence of an approved extension, there will be no opportunity to complete the task after the assigned date.

Number of Quizzes

1

Frequency of Quizzes

Other

Assessment Due Date

The opening and closes times will be provided on Moodle.

Return Date to Students

Week 7 Friday (2 Sept 2022)

Marks are available immediately after completing the assessment.

2 End of Term Online Test

Assessment Type

Online Test

Task Description

End of Term Online Test (60% weighting)

The end of term online test assesses content covered during weeks 6-12.

Week 6 - Endocrine System
Week 7 - Cardiovascular System
Week 8 - Lymphatic System and Immunity
Week 9 - Respiratory System
Week 10 - Digestive System

Week 11 - Urinary System

Week 12 - Reproduction and Development

Students will have one attempt and a time limit of 135 minutes to complete the end of term online test on Moodle in the exam week of term. The opening and closing dates will be provided on Moodle closer to the date to minimise clashes with other units. There is a minimum requirement in the assessment task: 50% of the available marks for this assessment item. In the absence of an approved extension, there will be no opportunity to complete the task after the assigned date.

Assessment Due Date

The opening and closes times will be provided on Moodle.

Return Date to Students

Exam Week Friday (21 Oct 2022)

Marks are available immediately after completing the assessment.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
