General Information

Overview

In this unit you will study the structure and function of the immune system and be introduced to foundational concepts that underpin how the immune system works. You will explore the mechanisms that control the human body's ability to detect, contain and remove or destroy harmful pathogens whilst retaining tolerance to its own cells. You will also demonstrate your competency in understanding and analysing laboratory tests in the assessment of the immune response. Depending on your discipline, you will be required to attend a residential school.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Assessment was set up so it connected the dots between the content provided weekly.

Recommendation

To continue to keep the current format of assessment items.

Feedback from Student feedback and self-reflection

Feedback

Lecture recordings could be broken down into the sections they are presented.

Recommendation

To block the lecture recordings as per subheadings to break up the length of the videos.
