

BMSC12007 *Neurological Physiology & Measurement*

Term 1 - 2020

Profile information current as at 19/04/2024 10:10 am

All details in this unit profile for BMSC12007 have been officially approved by CQUUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

Corrections

Unit Profile Correction added on 30-03-20

The end of term examination has now been changed to an alternate form of assessment. Please see your Moodle site for details of the assessment.

Unit Profile Correction added on 19-04-20

Report assessment which requires attendance to a residential school has now been converted to an online task. Please see your Moodle site for details of the assessment.

General Information

Overview

Accurate assessment and management of neurological conditions requires comprehensive knowledge of neuroanatomy and neurophysiology. You will study the anatomy and physiology of the nervous system, the pathophysiology of neurological conditions and diagnostic tests related to neurological function. This unit prepares you for entry into the clinical environment by discussing the foundational knowledge of neurophysiology and application of key clinical concepts that will be required to provide health care to patients within your chosen health profession.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite: BMSC11001 Human Body Systems 1 OR ALLH11004 Anatomy and Physiology for Health Professionals OR BMSC11007 Medical Anatomy and Physiology 1 OR BMSC11008 Medical Anatomy and Physiology 2

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2020

- Brisbane
- Bundaberg
- Cairns
- Mackay
- Melbourne
- Mixed Mode
- Rockhampton
- Sydney
- Townsville

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Report**

Weighting: 30%

2. **Written Assessment**

Weighting: 30%

3. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback, self reflection

Feedback

Clinical case scenarios as an assessment item assisted in application of theory to real world situations

Recommendation

Continue use of clinical case scenarios as an assessment item

Feedback from Student feedback, peer review

Feedback

Addition of more practice quizzes to consolidate learning

Recommendation

Enhance the existing practice quizzes available throughout the term

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Explain the detailed structure and function of the central and peripheral nervous system
2. Apply knowledge of neuroanatomy and neurophysiology to interpret key clinical concepts
3. Describe assessment of neurological function in different neurological conditions
4. Identify the pharmacological basis of drugs that affect the nervous system.

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes			
	1	2	3	4

Schedule

Week 1 - 09 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Neuroanatomy overview and basic definitions	2	

Week 2 - 16 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Brain and Environs: Cranium, Ventricles and Meninges	5	Tutorial discussion of Clinical case week 2

Week 3 - 23 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Corticospinal Tract and other motor pathways	6	Tutorial discussion of Clinical case week 3

Week 4 - 30 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Somatosensory pathways Spinal nerve roots Major plexuses and peripheral nerves	7, 8, 9	Tutorial discussion of Clinical case week 4

Week 5 - 06 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
Cerebral Hemispheres and vascular supply	10	Tutorial discussion of Clinical case week 5

Vacation Week - 13 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 20 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
Brainstem and cranial nerves EEG, epilepsy and seizures	12 Moodle resource	Tutorial discussion of Clinical case week 6

Week 7 - 27 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
Cerebellum and Basal Ganglia	15,16	Tutorial discussion of study questions weeks 1 to 3

Week 8 - 04 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
Limbic System and higher order cerebral function	18,19	Tutorial discussion of study questions weeks 4 to 6

Week 9 - 11 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
ANS, neuropharmacology	Moodle resource	No tutorial due to residential school WRITTEN ASSESSMENT Due: Week 9 Friday (15 May 2020) 11:45 pm AEST

Week 10 - 18 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
Revision		Tutorial discussion of study questions weeks 7 to 9 REPORT Due: Week 10 Friday (22 May 2020) 11:45 pm AEST

Week 11 - 25 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
No lecture due to residential school		Tutorial discussion Q&A

Week 12 - 01 Jun 2020

Module/Topic	Chapter	Events and Submissions/Topic
Revision		No tutorial

Review/Exam Week - 08 Jun 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 15 Jun 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

The teaching team consists of Romeo Batacan and Alannah van Waveren. Romeo is the unit coordinator for this unit and will be conducting the tutorials and residential schools, and responding to student's Moodle queries, Alannah will be delivering the live lectures throughout the term, and conducting residential schools.

You can contact the teaching staff via the unit's Moodle Q&A forum. This forum is a great place to post questions relevant to your study. Please don't feel shy in asking questions as you will often find that other students also share your query. The Q&A forum will be monitored on a daily basis and you can expect responses in a timely manner. If your queries are of a personal nature, you are welcome to contact the unit coordinator via email at r.j.batacan@cqu.edu.au or phone 07 4930 9278.

The General Discussion forum is a social space where students can communicate with other students in this unit. Please ensure that your conduct within this forum is consistent with the Student Charter.

Live lectures and tutorials will be delivered each week from Rockhampton campus, available to multiple other campuses and will be simultaneously recorded. The recordings of the lectures and tutorials will be available on the unit's Moodle site for all students to access. During the tutorials we will discuss clinical cases and weekly study questions that are provided to you on the Moodle site. The weekly study questions will focus on the key learning objectives for each week and assist in your preparation for the assessment items.

As per Australian education standards, you are expected to commit 150 hours of engagement to your study of this unit. For example, this can be broken as:

- 2-3 hours per week watching recorded lectures and revising content through study notes
- 1-2 hours per week for completing assigned reading
- 2-3 hours per week completing the weekly study questions and attending tutorials
- 3-4 hours per week preparing your assessments or studying for the exam

There is a compulsory residential school for students of CB77, CB84, CG85 and CG93 courses enrolled in this unit. The residential school sessions for this unit will run as follows:

Session 1: Mackay campus. Week 7: April 29 and 30, 2020 (CB77 students and mixed mode students only)

Session 2: Sydney campus. Week 9: May 12 and 13, 2020 (CB77 students and mixed mode students only)

Session 3: Brisbane campus. Week 9: May 15 and 16, 2020 (CB77 students and mixed mode students only)

Session 4: Rockhampton campus. Week 9: May 15 and 16, 2020 (CB84, CG85 and CG93 students and mixed mode students only)

Session 5: Rockhampton campus. Week 11: May 25 and 26, 2020 (CB84, CG85 and CG93 students and mixed mode students only)

Note: You are required to sign up for one session only.

You must attend the residential school session at the campus where you are enrolled to complete your course of study. Please nominate your campus for the residential school session via student allocator before making arrangements for travel and accommodation. For work and health safety reasons, it is essential that you nominate your residential school session in order to secure a place. To ensure you can secure your preferred attendance dates it is recommended that you nominate your residential school session at the start of term. More information about enrolling into residential school will be available on Moodle.

Please note: The practical sessions for this unit are run as a 2 day block. For on-campus students this is referred to as a practical session and for mixed mode students it is referred to as a residential school. In effect, for this unit the practical sessions and residential school are the same thing, occur on the same dates and provide an opportunity for on campus and mixed mode students to meet each other.

For students enrolled in the CG95 course, you are not required to attend a residential school but must complete a workbook and submit a report.

Assessment Tasks

1 REPORT

Assessment Type

Report

Task Description

You will complete a series of tasks and interpret data generated from neurophysiological measurement equipment. Tasks will include questions on brain structure, reflexes, EEG, EMG, and sensory and motor experiments.

For students enrolled in the CB77, CB84, CG85 and CG93 courses: You are required to attend a residential school where an Objective Structured Clinical Examination (OSCE) will be conducted. Neurological assessments for the OSCE will be

specific to student's course of study. Within one week of attending the residential school you are required to submit a completed workbook and report.

For students enrolled in the CG95 course: You are not required to attend a residential school. Instead, you will be required to attempt a clinical case study specific to your health profession. In addition, you are also required to submit a completed workbook and report.

The workbook for this assessment will have a set of tasks and questions which are graded and will make up 30% of your final grade.

Assessment Due Date

Week 10 Friday (22 May 2020) 11:45 pm AEST

The completed workbook and report must be submitted by Week 10 Friday 11:45PM AEST (CG95 students) or within one week of attending the residential school (CB77, CB84, CG85 and CG93 students).

Return Date to Students

Week 12 Friday (5 June 2020)

Due to the multiple number of residential school sessions running until week 11, the report results will be available to students in week 12.

Weighting

30%

Minimum mark or grade

In order to pass this unit, you must achieve 50% of the available marks for this assessment item.

Assessment Criteria

Questions will be marked as per marking scheme. The maximum score that can be achieved from this assessment item equals 30% of the total unit marks.

If your assessment is submitted after the due date/time without an approved extension it will be penalised 5% per 24 hour period that it is late.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

To be uploaded and submitted on Moodle.

Learning Outcomes Assessed

- Describe assessment of neurological function in different neurological conditions

Graduate Attributes

- Communication
- Problem Solving
- Information Literacy
- Information Technology Competence

2 WRITTEN ASSESSMENT

Assessment Type

Written Assessment

Task Description

In your role as a health professional you will be required to provide health care to patients with all kinds of neurological conditions. This assessment task is designed to present a real world presentation of a neurological condition similar to what you may come across in the clinical environment. You will be presented with a clinical case scenario along with information regarding the physical and neurological condition of a patient. You will be required to answer a set of questions based on this clinical case scenario. This assessment item is designed to assess your understanding of nervous system anatomy and physiology, pathophysiology of neurological conditions and application of key clinical concepts.

Assessment Due Date

Week 9 Friday (15 May 2020) 11:45 pm AEST

Return Date to Students

Week 12 Friday (5 June 2020)

Weighting

30%

Minimum mark or grade

In order to pass this unit, you must achieve 50% of the available marks for this assessment item.

Assessment Criteria

Assessment criteria will be based on knowledge of theory, rationalisation, presentation of information and referencing. A detailed marking rubric will be available on Moodle.

If your assessment is submitted after the due date/time without an approved extension it will be penalised 5% per 24 hour period that it is late.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

To be uploaded on Moodle and submitted as a Word document.

Learning Outcomes Assessed

- Explain the detailed structure and function of the central and peripheral nervous system
- Apply knowledge of neuroanatomy and neurophysiology to interpret key clinical concepts
- Describe assessment of neurological function in different neurological conditions
- Identify the pharmacological basis of drugs that affect the nervous system.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

40%

Length

180 minutes

Minimum mark or grade

In order to pass this unit, you must achieve 50% of the available marks for the exam.

Exam Conditions

Closed Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
