

BMSC12009 *Sleep Physiology and Measurement*

Term 2 - 2019

Profile information current as at 29/04/2024 11:46 am

All details in this unit profile for BMSC12009 have been officially approved by CQU University and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit enables students to relate diagnostic monitoring of sleep behaviour across the lifespan via polysomnography to sleep physiology and specific sleep disorder groups. Common causes and treatments for sleep disordered breathing, insomnia, hypersomnia and sleep related movement disorders will be investigated.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

BMSC12007 Neurological Physiology and Measurement

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2019

- Online
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Group Discussion**

Weighting: 40%

3. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit evaluation and self reflection

Feedback

Weekly worksheet study tools assisted students to focus on key concepts.

Recommendation

Continue provision of weekly study tools

Feedback from Unit evaluation, student feedback

Feedback

Real world assessment items such as clinical case scenarios assisted with application of theory into context

Recommendation

Continue use of clinical case scenarios

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe normal sleep physiology with reference to gender and age specific differences.
2. Define circadian rhythms and factors that influence them.
3. Analyse the diagnosis and consequences of sleep deprivation.
4. Describe the measurement and function of polysomnographic recording of sleep behaviour.
5. Interpret the analysis process for sleep staging of polysomnographic recordings.
6. Explore causes, clinical features and treatment of sleep disordered breathing.
7. Discuss the prevalence, types and treatments for insomnia.
8. Describe symptoms, monitoring and evaluation techniques for hypersomnia.
9. Discuss and differentiate sleep related movement disorders.
10. Evaluate the use of polysomnography in investigating sleep disordered breathing in children.

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Schedule

Week 1 - 15 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Normal sleep physiology	Chapters 6 and 7 Fundamentals of Sleep Medicine (Richard Berry, 2012)	

Week 2 - 22 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Circadian rhythms	Chapter 26 Fundamentals of Sleep Medicine (Richard Berry, 2012)	

Week 3 - 29 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Polysomnography: Basic sleep monitoring Types of monitoring devices	Chapters 1, 2, and 13 Fundamentals of Sleep Medicine (Richard Berry, 2012)	Tutorial on content from weeks 1-2

Week 4 - 05 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Polysomnography: Analysis of Sleep
 Chapters 3 and 4
 Fundamentals of Sleep Medicine
 (Richard Berry, 2012)

Week 5 - 12 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Polysomnography: Monitoring respiration & monitoring limb movements	Chapters 8, 9 and 12 Fundamentals of Sleep Medicine (Richard Berry, 2012)	Tutorial on content from weeks 3-5

Vacation Week - 19 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 26 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Sleep deprivation and its consequences	Chapter 6 Fundamentals of Sleep Medicine (Richard Berry, 2012)	Tutorial to discuss group work assessment Written Assessment Due: Week 6 Friday (30 Aug 2019) 11:55 pm AEST

Week 7 - 02 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Obstructive sleep apnea	Chapters 15 - 20 Fundamentals of Sleep Medicine (Richard Berry, 2012)	

Week 8 - 09 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Central sleep apnea	Chapter 21 Fundamentals of Sleep Medicine (Richard Berry, 2012)	

Week 9 - 16 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Insomnia	Chapter 25 Fundamentals of Sleep Medicine (Richard Berry, 2012)	Tutorial on content from weeks 6-9

Week 10 - 23 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Hypersomnia	Chapters 14 and 24 Fundamentals of Sleep Medicine (Richard Berry, 2012)	Group Work Due: Week 10 Friday (27 Sept 2019) 11:55 pm AEST

Week 11 - 30 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Sleep-related movement disorders	Chapter 23 Fundamentals of Sleep Medicine (Richard Berry, 2012)	

Week 12 - 07 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
Revision		

Review/Exam Week - 14 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 21 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Please see the timetable for details regarding the lectures. Lectures will be held on the Rockhampton campus and will be available online for distance students.

Tutorials will be held online via zoom. A poll will be available at the start of term on the Moodle site for students to nominate their preferred date and time for the online tutorial. All tutorial sessions will be recorded and made available on the Moodle site.

Assessment Tasks

1 Written Assessment

Assessment Type

Written Assessment

Task Description

In your role as a clinical measurement scientist, you will be required to conduct polysomnography and score sleep studies. This assessment task is designed to present a real-world presentation of a sleep study similar to those you may encounter in the clinical environment. You will be presented with a clinical case scenario along with information regarding the sleep study. This assessment item is designed to assess your knowledge of normal sleep physiology, circadian rhythms and sleep staging of polysomnographic recordings. The questions will be short and long answer type and will focus on topics from weeks 1-5 of the unit content. Each question will require you to apply your knowledge of normal sleep physiology and polysomnography to the given scenario.

Assessment Due Date

Week 6 Friday (30 Aug 2019) 11:55 pm AEST

Return Date to Students

Week 9 Friday (20 Sept 2019)

Weighting

20%

Minimum mark or grade

To pass this unit, you are required to attain a minimum of 50% of the marks available for this assessment.

Assessment Criteria

Each question will be allocated a specific number of marks. The marking rubric will be available on the unit's Moodle site. Assessment criteria will be based on:

- Knowledge of theory
- Application of foundational concepts
- Correct use of terminology
- Presentation of information
- Referencing

If your assessment item is submitted after the due date/time without an approved extension, it will be penalised 5% per 24 period that it is overdue.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

To be submitted as a Word document

Learning Outcomes Assessed

- Describe normal sleep physiology with reference to gender and age specific differences.
- Define circadian rhythms and factors that influence them.
- Describe the measurement and function of polysomnographic recording of sleep behaviour.

- Interpret the analysis process for sleep staging of polysomnographic recordings.

Graduate Attributes

- Communication
- Information Literacy

2 Group Work

Assessment Type

Group Discussion

Task Description

In your role as a clinical measurement scientist, you will be required to conduct tests on patients with a variety of sleep disorders. As such, knowledge of signs, symptoms, risk factors, pathophysiology and diagnostic techniques in sleep disorders is required. In a clinical setting, you will also be working in a team environment with other clinical measurement scientists and health professionals. This task is a group work activity in which you will be required to develop a hypothetical clinical case study on a sleep disorder aimed at educating your fellow peers. This activity will require you to research information, recall concepts of normal sleep physiology and measurement and apply the knowledge of sleep disorders and investigations. This assessment is designed to strengthen your knowledge of sleep disorders as discussed in the second half of the term and to give you experience in presenting case studies for clinical meetings or conference presentations.

Students will be randomly designated into groups of three or four students each by the unit coordinator. Group allocation will occur at the end of week 4, after census date. Each group will choose a sleep disorder for their group. Within each group, each student will contribute to the preparation of a hypothetical clinical case study on the chosen sleep disorder.

The group work assessment task has two parts:

Part A: Group Work 15%

Part A is divided into two sections.

1. Case study scenario: 10%

Once each group has chosen a sleep disorder, group members must collectively develop a case study scenario based on their chosen sleep disorder. The scenario will be up to 250 words in length and will provide a description of the case study specific to the groups' chosen sleep disorder. For example, the scenario may begin as 'A 30-year-old man with a BMI of ...' and will proceed to highlight features characteristic of the sleep disorder and provide background information relevant to the case study. Examples of case study scenarios will be provided to you on the Moodle unit page. Students must work collectively in a group to develop this scenario. The sections of the case study which require individual work will be dependent on the case study scenario the group develops collectively.

2. Self and Peer Review: 5%

To assess each member's contribution to the group work, you will take part in two self and peer assessments. In confidence, each person within a group will score themselves and other team members for their degree of contribution to the group work activity.

Part B: Individual Work 25%

Each team member will individually prepare a section of the case study. This part of the case study will include sections such as:

- Risk factors (if any) for the sleep disorder
- Signs and symptoms the patient may present with
- Pathophysiology of the sleep disorder
- Diagnostic techniques used for the investigation of the sleep disorder

Both Part A and Part B must be submitted via Moodle.

Assessment Due Date

Week 10 Friday (27 Sept 2019) 11:55 pm AEST

Return Date to Students

Week 12 Friday (11 Oct 2019)

Weighting

40%

Minimum mark or grade

Students must obtain at least 50% of the marks available for this group task to pass this unit.

Assessment Criteria

Each question will be allocated a specific number of marks. The marking rubric will be available on the unit's Moodle site. Assessment criteria will be based on:

- Knowledge of theory
- Application of foundational concepts
- Correct use of terminology
- Presentation of information
- Feedback provided to peers
- Referencing

If your assessment item is submitted after the due date/time without an approved extension, it will be penalised 5% per 24 period that it is overdue.

Referencing Style

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

40%

Length

180 minutes

Minimum mark or grade

To pass this unit, you are required to attain a minimum of 50% of the marks available for the exam.

Exam Conditions

Closed Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
