## General Information

### Overview

This unit has been developed for you to begin your journey in the expansive field of research. This unit will introduce you to some fundamental principles of research practice and allow for a greater appreciation of research methodology, critical appraisal and basic statistical analysis. This unit will utilise the principle that 'reading research' should be the first goal of any research course. You will be given research articles to read in preparation for all weekly lectures and offered the opportunity to undertake formative assessment utilising the lecture material and the pre-lecture readings. You will also learn how to utilise various critical appraisal techniques to allow you to confidently use research findings to help you make evidence-based clinical decisions. By the end of this unit, you will be equipped to not only embark on more rigorous research related units and be prepared to undertake the foundations of an Honours or Masters level research project but also be able to understand how research can be used to make evidence-informed clinical decisions.

### Details

### Offerings For Term 2 - 2024

- Brisbane

### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Assessment Overview

#### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from SUTE

##### Feedback

Students generally enjoyed the tutorial content, however some students would enjoy tutorials that are more engaging and inclusive in nature.

##### Recommendation

It is recommended that the coordinator continues to try to make tutorials more engaging and inclusive in nature.

#### Feedback from SUTE

##### Feedback

Students reported that the coordinator is extremely passionate about research and would like to interact with her more.

##### Recommendation

It is recommended that the coordinator continue to approach the unit with enthusiasm and aim to provide more opportunities where students can interact with research.

## Unit Learning Outcomes

**On successful completion of this unit, you will be able to:**

1. Critique the advantages and disadvantages of various research designs used in primary and secondary research
2. Evaluate research using standardised and non-standardised critical appraisal methods
3. Analyse basic research data and provide appropriate summaries for further evaluation
4. Compose a research question in order to develop a collaborative proposal to investigate a selected field of enquiry
5. Discuss the strengths and weaknesses of published research within a contextualised and patient-centred framework.
