General Information

Overview

This unit introduces object-oriented programming principles extensively. You will learn to develop interactive software applications using a modern programming language, integrated development environment (IDE), and graphical user interface (GUI) components. You will learn how to use classes, objects, methods, inheritance, polymorphism, foundation data structures and exception handling in your application development. In addition, you will learn how to apply these skills in solving practical problems.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit coordinator reflection

Feedback

Ten weekly lab submissions, along with three major assignment submissions, are too much for students.

Recommendation

Reduce lab submissions from 10 to 8 (total weighting remains unchanged).
