

# COIT11222 *Programming Fundamentals*

## Term 3 - 2020

Profile information current as at 03/05/2024 03:36 am

All details in this unit profile for COIT11222 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

### General Information

#### Overview

This unit will help you become a computer programmer even if you have had no programming experience. You will cover topics such as pseudocode, variables, constants, data types, operators, expressions, statements, classes, objects, inheritance, loops, methods, passing parameters and arrays. You will learn how to design, implement and test programs using a modern Integrated Development Environment (IDE).

#### Details

Career Level: *Undergraduate*

Unit Level: *Level 1*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

#### Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

#### Offerings For Term 3 - 2020

- Brisbane
- Melbourne
- Online
- Sydney

#### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

#### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Written Assessment**

Weighting: 20%

#### 2. **Written Assessment**

Weighting: 25%

#### 3. **Project (applied)**

Weighting: 55%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Have your say

##### **Feedback**

Students (especially international students) are struggling with the online format.

##### **Recommendation**

It would be great to return to face to face teaching but this is not possible in the current situation. Possibly have smaller online classes and encourage more interaction with the students. At risk students will be identified and contacted.

#### Feedback from Have your say

##### **Feedback**

Students are very satisfied with the teaching staff

##### **Recommendation**

Continue delivering the content and interactions with students at a high standard which follows the principles of good teaching practices.

#### Feedback from Self reflection

##### **Feedback**

It is essential students have the JDK and an IDE installed on their own devices.

##### **Recommendation**

Encourage students to install the relevant software and offer assistance via Zoom to help with the installation.

## Unit Learning Outcomes

### **On successful completion of this unit, you will be able to:**

1. Understand the principles of object-oriented programming
2. Develop programs using various data types, operators, expressions, statements and loops
3. Develop programs using arrays for storing, searching and sorting data
4. Develop programs using user-defined methods, parameters and arguments
5. Develop programs using graphical user interface
6. Apply techniques used to produce quality programs.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles

ACS members can use the tool MySFIA to build a skills profile at <https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>

This unit contributes to workplace skills as defined by SFIA. The SFIA code is included:

- Program ming/Software Development (PROG)

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

## Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes					
	1	2	3	4	5	6
1 - Written Assessment - 20%		•		•		•
2 - Written Assessment - 25%	•		•		•	•
3 - Project (applied) - 55%	•	•	•	•	•	

## Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes					
	1	2	3	4	5	6
1 - Communication						
2 - Problem Solving	•	•	•	•	•	•
3 - Critical Thinking		•	•	•	•	•
4 - Information Literacy	•	•	•	•	•	•
5 - Team Work	•	•	•	•	•	•
6 - Information Technology Competence	•	•	•	•	•	•
7 - Cross Cultural Competence						
8 - Ethical practice						
9 - Social Innovation						
10 - Aboriginal and Torres Strait Islander Cultures						

## Alignment of Assessment Tasks to Graduate Attributes

Assessment Tasks	Graduate Attributes									
	1	2	3	4	5	6	7	8	9	10
1 - Written Assessment - 20%	•	•	•	•		•

## Textbooks and Resources

### Textbooks

COIT11222

#### Prescribed

##### **JAVA Programming**

Edition: 9th edn (2018)

Authors: Joyce Farrell

CENGAGE Learning

Boston , MA , USA

ISBN: 9781337397070

Binding: Paperback

[View textbooks at the CQUniversity Bookshop](#)

### IT Resources

**You will need access to the following IT resources:**

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- JDK, <http://www.oracle.com/technetwork/java/javase/downloads/index.html>
- (Optional) NetBeans, <http://netbeans.org/downloads/index.html>
- TextPad, <http://www.textpad.com/download/index.html>

## Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

## Teaching Contacts

## Schedule

### **Week 1 - 09 Nov 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Creating Java Programs	Chapter 1	

### **Week 2 - 16 Nov 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Using Data	Chapter 2	

### **Week 3 - 23 Nov 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Making Decisions	Chapter 5	

### **Week 4 - 30 Nov 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Looping	Chapter 6	

### **Vacation Week - 07 Dec 2020**

Module/Topic	Chapter	Events and Submissions/Topic
<b>Week 5 - 14 Dec 2020</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Using Methods, Classes and Objects	Chapter 3	
<b>Week 6 - 21 Dec 2020</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
More Object Concepts	Chapter 4	
<b>Vacation Week - 28 Dec 2020</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
<b>Week 7 - 04 Jan 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Arrays	Chapter 8	<b>Assignment one</b> Due: Week 7 Monday (4 Jan 2021) 11:59 pm AEST
<b>Week 8 - 11 Jan 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Advanced Array Concepts	Chapter 9	
<b>Week 9 - 18 Jan 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Introduction to Swing Components	Chapter 14	
<b>Week 10 - 25 Jan 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Characters, Strings, and the StringBuilder	Chapter 7	
<b>Week 11 - 01 Feb 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Files Input and Output	Chapter 13	<b>Assignment two</b> Due: Week 11 Friday (5 Feb 2021) 11:59 pm AEST
<b>Week 12 - 08 Feb 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Revision		
<b>Exam Week - 15 Feb 2021</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
		<b>Project</b> Due: Exam Week Friday (19 Feb 2021) 11:59 pm AEST

## Assessment Tasks

### 1 Assignment one

#### Assessment Type

Written Assessment

#### Task Description

This assessment item is designed to test your understanding of topics such as variables, constants, types, operators, standard input/output, loops, if statements, classes, objects and methods. The assessment task is to write, compile and execute java programs using the above mentioned topics. Further details are available on the unit website in the Assessment 1 Specification document.

**Assessment Due Date**

Week 7 Monday (4 Jan 2021) 11:59 pm AEST

**Return Date to Students**

Week 9 Monday (18 Jan 2021)

**Weighting**

20%

**Assessment Criteria**

1. Efficient object-oriented program design.
2. Appropriate use of variables, constants, types, operators, expressions, statements and loops.
3. Appropriate use of objects, classes and methods.
4. Effective use of good programming practice/techniques.
5. Rigorous testing of the program for logic, runtime and other errors.
6. Compilation and execution of the program using a modern IDE.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Submission Instructions**

Submit via the submission link in Moodle

**Learning Outcomes Assessed**

- Develop programs using various data types, operators, expressions, statements and loops
- Develop programs using user-defined methods, parameters and arguments
- Apply techniques used to produce quality programs.

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

## 2 Assignment two

**Assessment Type**

Written Assessment

**Task Description**

This assessment item is designed to test your understanding of topics such as GUI input/output, arrays, objects, methods with parameters and searching. The assessment task is to write, compile and execute a Java program using the above mentioned topics. Further details are available on the unit website in the Assessment 2 Specification document.

**Assessment Due Date**

Week 11 Friday (5 Feb 2021) 11:59 pm AEST

**Return Date to Students**

Exam Week Friday (19 Feb 2021)

**Weighting**

25%

**Assessment Criteria**

1. Efficient object-oriented program design.
2. Appropriate use of variables, constants, types, operators, expressions, statements and loops.
3. Appropriate use of objects, classes and methods.
4. Effective use of good programming practice/techniques.
5. Rigorous testing of the program for logic and runtime errors, data validation and reuse of code.
6. Compilation and execution of the program using a modern IDE.
7. Efficient use of arrays, searching algorithms.
8. Appropriate use of graphical user interface.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Submission Instructions**

Submit via the submission link in Moodle

**Learning Outcomes Assessed**

- Understand the principles of object-oriented programming
- Develop programs using arrays for storing, searching and sorting data
- Develop programs using graphical user interface
- Apply techniques used to produce quality programs.

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

### 3 Project

**Assessment Type**

Project (applied)

**Task Description**

A programming project of student design which covers the topics learnt during the term.

**Assessment Due Date**

Exam Week Friday (19 Feb 2021) 11:59 pm AEST

**Return Date to Students**

Marks will be released on the certification date.

**Weighting**

55%

**Minimum mark or grade**

40% (22 marks)

**Assessment Criteria**

No Assessment Criteria

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Learning Outcomes Assessed**

- Understand the principles of object-oriented programming
- Develop programs using various data types, operators, expressions, statements and loops
- Develop programs using arrays for storing, searching and sorting data
- Develop programs using user-defined methods, parameters and arguments
- Develop programs using graphical user interface

**Graduate Attributes**

- Problem Solving
- Critical Thinking
- Information Literacy

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
