General Information

Overview

In this unit, you will explore problems that require technological solutions as systems analysis involves determining what a system needs to accomplish. This unit covers concepts such as systems feasibility, user requirements elicitation, and systems modelling. You will learn how to analyse systems requirements, select and plan how to take the system through all stages of the system development life cycle.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Staff

Feedback

Quizzes as part of the assessments are helpful in student learning, yet scoring high marks in quizzes requires more effort.

Recommendation

Review the workloads required and assessment weights of the quizzes.

Feedback from Staff

Feedback

Week 4 and 5 topics (cost-benefit analysis and economics of Project management) do not align with any of the ULOs. These topics are covered in depth in COIT12208.

Recommendation

Revise weekly contents to remove redundant topics (covered in other units) and to ensure the contents are aligned with the unit's learning outcomes.
