General Information

Overview
In this unit, you will explore problems that require technological solutions, as systems analysis involves determining what a system needs to accomplish. This unit covers concepts such as systems feasibility, requirements elicitation, and systems modelling. You will learn to distinguish and analyse user and system requirements, and to select and plan the process for guiding the system through each stage of the system development life cycle.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit Coordinator reflection

Feedback
Tutorial material does not incorporate enough practical and hands-on exercises for students in order to help them better understand the concepts and the theory in the unit.

Recommendation
In the tutorial, more engaging and hands-on questions and activities should be incorporated and assigned to students, in order for them to further understand the concepts in the lectures.
