General Information

Overview

While organisations can collect a large amount of data about their operations, a continual challenge they face is extracting useful information from that data. Dashboards summarise key information using visualisations and interactive reports. Dashboards are therefore an important tool in supporting decision making in an organisation. In this unit, you will learn how to design dashboards. You will develop skills to condense and encapsulate the characteristics of data, making it easier to analyse trends to drive effective decision-making. You will also learn creative ways to present the insights and findings of data using data visualisation tools and techniques.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Discipline meeting and student evaluation

Feedback

The lecture needs to be more interactive to enhance student engagement.

Recommendation

Revise the lecture materials to incorporate interactive elements, such as multimedia content and active learning strategies, to enhance student engagement and deepen learning outcomes.

Feedback from Student evaluation

Feedback

The tutorial duration should be extended from one hour to two hours to facilitate more in-depth discussions, incorporate practical activities, and enhance student engagement.

Recommendation

Consider increasing the tutorial duration in the next offering and supplementing it with additional resources to support deeper learning and student engagement.
