General Information

Overview

This unit equips you with web application design and development skills, incorporating the effective use of artificial intelligence (AI) tools throughout the development lifecycle. It focuses on utilising Generative AI (GenAI) and web development technologies in designing, coding, debugging, and testing web applications. You will explore how AI can enhance development efficiency, improve code quality, and automate testing while learning to integrate AI into web applications to achieve high-performing smart applications. Emphasis is placed on responsible AI usage, ensuring code quality and maintainability while preparing you for future jobs in AI-assisted application development.
