

COIT13230 *Application Development Project*

Term 2 - 2024

Profile information current as at 14/01/2025 07:50 pm

All details in this unit profile for COIT13230 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This capstone unit in the Application Development major of the Bachelor of Information Technology course is designed so that you can demonstrate your learning across the whole course of study before making the transition to the next stage of your career. You are required to demonstrate and apply the skills you have developed in earlier core and application development specialisation units by undertaking an authentic task group project or an industry project. You are required to synthesise and apply your skills developed across the units studied previously. This unit will help you to consolidate your competence with a relevant set of software engineering concepts, practices, and tools. To achieve this, you will work in small teams with a designated customer to identify a problem and develop a software application adhering to software engineering principles and standards. You will document and present the requirement analysis, identify potential cyber threats and system vulnerabilities, design artefacts, and the results from software testing. Your team will develop the project management, quality assurance, and cyber security components within project specifications. You will also evaluate and discuss your contribution to the project team and the overall team performance.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: *12*

Student Contribution Band: *8*

Fraction of Full-Time Student Load: *0.25*

Pre-requisites or Co-requisites

Pre-requisite: COIT12200, (COIT12207 or COIT13224) and (COIT12208 or COIS13064) Co-requisite: COIT13229 and COIT13234

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2024

- Brisbane
- Cairns
- Melbourne
- Online
- Rockhampton
- Sydney
- Townsville

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 12-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 25 hours of study per week, making a total of 300 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 15%

2. **Written Assessment**

Weighting: 10%

3. **Written Assessment**

Weighting: 25%

4. **Project (applied)**

Weighting: 40%

5. **Presentation**

Weighting: 10%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit Evaluation Data

Feedback

The response rate for the evaluation survey was below the expected level.

Recommendation

Educate students about the importance of unit evaluation and encourage them to complete the survey.

Feedback from Unit Coordinator Reflection

Feedback

"The unit emphasises progressive prototype development while minimising written reports to maximise students' focus on practical implementation."

Recommendation

Keep the main focus on prototype development rather than producing excessive amount of written reports.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Apply software engineering processes in the context of application development to address all phases of the Software Development Life Cycle (SDLC)
2. Manage a software development project using contemporary project management tools & techniques and a quality management plan
3. Design and develop complex software applications adhering to cybersecurity principles and ethical responsibility
4. Work and communicate effectively as part of a development team demonstrating advanced written and oral presentations.

The Australian Computer Society (ACS), the professional association for Australia's ICT sector, recognises the Skills Framework for the Information Age (SFIA). SFIA is adopted by organisations, governments, and individuals in many countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles. ACS members can use the tool [MySFIA](#) to build a skills profile.

This unit contributes to the following workplace skills as defined by [SFIA 8](#) (the SFIA code is included):

- Requirements definition and management (REQM)
- Programming/software development (PROG)
- Software Design (SWDN)
- Data modelling and design (DTAN)
- User experience evaluation (USEV)
- Database design (DBDS)
- Systems integration and build (SINT)
- Testing (TEST)
- Configuration management (CFMG)
- Application support (ASUP)
- System installation and removal (HSIN)
- Information Security (SCTY)

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Assessment Tasks

1 Project Proposal

Assessment Type

Written Assessment

Task Description

This is a **group** assessment. In this assessment, you are required to develop a project proposal for developing a complex real-world application. You should develop an original or semi-original idea for the application, which should be feasible and have business value.

The project proposal should be written into a document including the following 5 components or sections:

Project background

Project objectives

High-level user requirements

Hardware and software requirements

Risk management and quality assurance plan

The detailed specifications of this assessment will be provided on the Moodle unit website.

Assessment Due Date

Week 3 Friday (26 July 2024) 11:45 pm AEST

The assessment must be submitted to Moodle by the due date and time.

Return Date to Students

Week 5 Friday (9 Aug 2024)

The feedback will be returned within two weeks of the submission due date.

Weighting

15%

Assessment Criteria

The assessment criteria will be provided on the Moodle unit website.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must upload your project proposal as a Microsoft Word document which should include all components or sections outlined in the assessment specification. All group members must submit the same copy of the assignment.

Learning Outcomes Assessed

- Apply software engineering processes in the context of application development to address all phases of the Software Development Life Cycle (SDLC)

Graduate Attributes

2 Progress Report 1

Assessment Type

Written Assessment

Task Description

This is a **group** assessment, however, individuals may receive different scores based on their contributions.

In this assessment, you are required to report progress on the following 8 items:

Detailed user stories

Wireframes of all user interfaces

Major data structures

Database schema

Software architecture illustrating all components

Platforms/languages/tools/frameworks

Test plan (should include user acceptance test)

Project tracking tool

The detailed specifications of this assessment will be provided on the Moodle unit website.

Assessment Due Date

Week 5 Friday (9 Aug 2024) 11:45 pm AEST

The assessment must be submitted to Moodle by the due date and time.

Return Date to Students

Week 6 Friday (23 Aug 2024)

The feedback will be returned within two weeks of the submission due date.

Weighting

10%

Assessment Criteria

The assessment criteria will be provided on the Moodle unit website.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must upload your progress report as a Microsoft Word document which should include all components or sections outlined in the assessment specification. All group members must submit the same copy of the assignment.

Learning Outcomes Assessed

- Manage a software development project using contemporary project management tools & techniques and a quality management plan

Graduate Attributes

3 Progress Report 2

Assessment Type

Written Assessment

Task Description

This is a **group** assessment, however, individuals may receive different scores based on their contributions. For this assessment, you will demonstrate the current prototype of your enterprise application in the class as well as submit an updated report on the progress.

In the demonstration, you will run the current prototype of your enterprise application in a lab computer/your personal computer/your mobile device to demonstrate the user stories/interfaces/features/business logic that have been fully or partially implemented during the current progress period. You are also required to show evidence of tracking the progress of your project using a project-tracking tool (e.g., Jira).

In the update report, you will provide a brief update on the following 6 items for the current progress period:

1. User stories/interfaces/features/business logic implemented (provide screenshots of your outputs)
2. Implementation details of the various components of the prototype (provide screenshots of your code)
3. Test results for the implemented user stories/interfaces/features/business logic (provide screenshots and annotations)
4. Errors/problems with the implemented user stories/interfaces/features/business logic (provide screenshots, if possible).
5. User stories or other features introduced (if any)
6. User stories or other features dropped or modified (if any)

A copy of the prototype source code must be maintained in a GitHub repository and the link to the repository must be included in the report. The repository must contain the history of all changes in the source code.

The detailed specifications of this assessment will be provided on the Moodle unit website.

Assessment Due Date

Week 7 Friday (30 Aug 2024) 11:45 pm AEST

The assessment must be submitted to Moodle by the due date and time.

Return Date to Students

Week 9 Friday (13 Sept 2024)

The feedback will be returned within two weeks of the submission due date.

Weighting

25%

Assessment Criteria

The assessment criteria will be provided on the Moodle unit website.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must upload your progress report as a Microsoft Word document which should include all components or sections outlined in the assessment specification. All group members must submit the same copy of the assignment.

Learning Outcomes Assessed

- Apply software engineering processes in the context of application development to address all phases of the Software Development Life Cycle (SDLC)
- Manage a software development project using contemporary project management tools & techniques and a quality management plan
- Design and develop complex software applications adhering to cybersecurity principles and ethical responsibility

Graduate Attributes

4 In-class Project Demonstration and Report

Assessment Type

Project (applied)

Task Description

This is a **group** assessment, however, individuals may receive different scores based on their contributions. This assessment has two components - **Part 1: In-class Presentation and Demonstration**, and **Part 2: Final Report**. Part 1 and Part 2 submissions are due in Week 10 and Week 12 respectively.

Part 1: In-class Presentation and Demonstration (20 marks)

In this part, you are required to present all aspects of your enterprise application including the project background, objective, user stories, major data structures, database design, software architecture, sequence diagram, platforms/tools/frameworks, test results (including user acceptance test), and lessons learnt. Moreover, you will run the current prototype of your enterprise application in a lab computer/your personal computer/your mobile device to demonstrate the user stories/interfaces/features/business logic that have been fully or partially implemented during the current progress period. You are also required to show evidence of tracking the progress of your project using a project-tracking tool (e.g., Jira).

For this part, you must submit a presentation file to Moodle by the end of Week 10.

Part 2: Final Report (20 marks)

In this part, you are required to develop a final report containing a final project summary, user stories, major data structures, database design, software architecture, sequence diagram, platforms/tools/frameworks, test results (including user acceptance test), user manual and a project reflection.

A copy of the prototype source code must be maintained in a GitHub repository and the link to the repository must be included in the report.

For this part, you must submit the report as well as a copy of the final source code to Moodle by the end of Week 12. The detailed specifications of this assessment will be provided on the Moodle unit website.

Please note: This assessment task is selected to be included in your course-wide portfolio. The outcomes/artifacts of this assessment must be uploaded to Portfolium (<https://portfolium.com/activity>) by the submission due dates in addition to your submission to Moodle for marking.

Assessment Due Date

Week 11 Friday (27 Sept 2024) 11:45 pm AEST

Part 1 presentation must be submitted by Week 10 Friday 11:45 pm AEST. Part 2 report and source code must be submitted by Week 12 Friday 11:45 pm AEST.

Return Date to Students

The feedback will be returned within two weeks of the corresponding submission due dates.

Weighting

40%

Assessment Criteria

The assessment criteria will be provided on the Moodle unit website.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must upload your presentation as a PowerPoint Presentation file, your report as a Microsoft Word file, and the source code as a Zip file. All group members must submit the same copy of the assignment.

Learning Outcomes Assessed

- Apply software engineering processes in the context of application development to address all phases of the Software Development Life Cycle (SDLC)
- Manage a software development project using contemporary project management tools & techniques and a quality management plan
- Design and develop complex software applications adhering to cybersecurity principles and ethical responsibility
- Work and communicate effectively as part of a development team demonstrating advanced written and oral presentations.

Graduate Attributes

5 Public Presentation and Demonstration of Final Project Outcomes

Assessment Type

Presentation

Task Description

This is a **group** assessment. In this assessment, each group is required to present their final project outcomes in a public presentation. Each member of a group **MUST** take part in the presentation. In general, all team members will receive the same mark in this assessment. However, if performance varies significantly across team members, individual marks can be awarded.

The presentation will cover:

1. Demonstration of a fully running enterprise application
2. Presentation of the final project outcomes

Each group will have **15-20 minutes** to present the above items to the plenary.

With (1) above, it is advised that each group must install their enterprise application on their personal computer/mobile device prior to the delivery of the presentation. The mobile app must be demonstrated during the presentation.

With (2) above, each group must also present all aspects of their enterprise application development project covering the project background, objective, user stories, major data structures, database design, software architecture, sequence diagram, platforms/tools/frameworks, test results (including user acceptance test), and lessons learnt.

The final presentation session will be held on Monday Review/Exam Week. The presentation session will be a conference-style event, running up to 1 day. Groups will be assigned to present at time slots during the day, and also be required to view presentations of other groups. You will have to make yourself available for the whole day on the day of the presentation. The Head of Course or Unit Coordinator will schedule the time of presentation.

The detailed specifications of this assessment will be provided on the Moodle unit website.

Please note: This assessment task is selected to be included in your course-wide portfolio. The outcomes/artifacts of

this assessment must be uploaded to Portfolium (<https://portfolium.com/activity>) by the submission due date in addition to your submission to Moodle for marking.

Assessment Due Date

Review/Exam Week Monday (7 Oct 2024) 9:00 am AEST

The assignment must be submitted to Moodle by the above time and date.

Return Date to Students

The feedback will be returned on the day of certification of grades.

Weighting

10%

Assessment Criteria

The feedback will be returned on the day of the certification of grades.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

The submission should contain your presentation file, fully running enterprise application, and a link to the GitHub repository of your source code. All group members must submit the same copy of the assignment.

Learning Outcomes Assessed

- Work and communicate effectively as part of a development team demonstrating advanced written and oral presentations.

Graduate Attributes

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
