General Information

Overview

Mobile devices have become essential for communication, social media and business applications. In this unit, you will create a range of mobile applications with features that include UI design, database, email, HTTP, remote API calls, threading and services. Through the development process, you will research opportunities for mobile application development to design a solution. On completion of this unit, you will be able to create mobile applications with consideration of market needs for the design and development of mobile applications.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit Coordinator Reflection

Feedback

Increased use of AI-assisted tools improved student efficiency in completing assessments but may have reduced opportunities to demonstrate authentic conceptual understanding.

Recommendation

Embed brief, verifiable reasoning components within assessments, such as short in-class demonstrations and annotated reflections.
