# COIT20251 *Knowledge Audits for Business* *Analysis* Term 2 - 2022

Profile information current as at 18/05/2022 06:42 am

All details in this unit profile for COIT20251 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

## General Information

### Overview

In this unit, you will explore elicitation tools and techniques to identify, develop, model and report the requirements specification required to implement an enterprise system. You will learn how knowledge audits are employed to identify knowledge assets and knowledge capabilities, internal and external to an organisation, for their organisational systems or enterprise systems. This unit is a key element in the development of business analysis skills in students.

### Assessment Overview

#### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Unit evaluation

**Feedback**

Real-life examples and authentic assessment tasks helped students engage with this unit.

**Recommendation**

Continue providing real-life examples and designing authentic assessment tasks.

#### Feedback from Unit coordinator's reflection

**Feedback**

The unit doesn't appear to be meeting all learning outcomes.

**Recommendation**

Review and update the unit content and assessment tasks.

## Unit Learning Outcomes

**On successful completion of this unit, you will be able to:**

1. Devise an appropriate and comprehensive knowledge audit plan to support business analysis requirements
2. Use appropriate modelling tools to present the identified knowledge assets and knowledge capabilities within the business context of enterprise systems, as interpreted and analysed through knowledge audits
3. Apply the techniques of knowledge capture, knowledge codification and knowledge sharing (using appropriate technologies) after the performance of knowledge audits
4. Critically review knowledge management approaches to the implementation of enterprise systems within an organisation and any issues that may arise
5. Appraise the ethical and professional issues relevant to a business analyst working with knowledge-based enterprise systems
6. Effectively write and communicate enterprise systems specifications that enable management of knowledge.
