

COIT20256 *Data Structures and Algorithms*

Term 1 - 2017

Profile information current as at 05/05/2024 06:42 pm

All details in this unit profile for COIT20256 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit is designed for students who want to study advanced data structures and algorithms for software development using an object oriented programming language. Students will learn to evaluate the use of data structures and algorithms to construct solutions to information technology problems. Topics covered include: classes, inheritance, polymorphism, exceptions, graphical user interfaces, database programming, recursion, linked lists, stacks, queues, priority queues, trees, search trees, graphs, sorting and searching algorithms. The object-oriented design will also be covered. Note: If you have completed unit COIT23001 then you cannot take this unit.

Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite: COIT20245 Introduction to Programming

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2017

- Brisbane
- Distance
- Melbourne
- Rockhampton
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Practical and Written Assessment**

Weighting: 15%

2. **Practical and Written Assessment**

Weighting: 30%

3. **Examination**

Weighting: 55%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Moodle Course evaluation

Feedback

One suggestion feedback is to have JQuery and JSF as part of the course. These are already covered in other courses. A number of suggestions are on improved clarity of the Assignment.

Recommendation

The Assignment specification can be made clearer with no major changes. The formal review will also help to achieve this.

Action

Assignment specification is peer reviewed.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Compare and contrast different algorithms in problem solving.
2. Choose and compare appropriate data structures in program design.
3. Evaluate a variety of data structures and algorithmic approaches including: recursion, linked lists, stacks, queues, trees, graphs, sorting and searching.
4. Analyse, develop and implement software solutions with the focus of data structures and algorithms.
5. Apply classes, inheritance, polymorphism and exception handling in the context of data structures and algorithms.
6. Programmatically connect to a database and implement the database operations.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.

ACS members can use the tool MySFIA to build a skills profile at

<https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>

This unit contributes to the following workplace skills as defined by SFIA. The SFIA code is included:

- Systems design (DESN)
- System Integration (SINT)
- Program ming/Software Development (PROG)
- Data Analysis (DTAN)
- Database/Repository Design (DBDS)
- Testing (TEST)
- Applications Support (ASUP)

Textbooks and Resources

Textbooks

COIT20256

Prescribed

Java How to Program : Early Objects Edition

Edition: 10 (2014)

Authors: Paul Deitel & Harvey Deitel

Pearson

Upper Saddle River , NJ , USA

ISBN: 9781292018195

Binding: Paperback

Additional Textbook Information

This unit has an open book final examination where students can take their Textbook with them to the examination. Therefore, it may be better to buy a hard copy of the Textbook even though rest of the study can be managed with an e-Book. Students can take a copy of consolidated notes to refer in the examination. So it is not mandatory to buy a Textbook.

[View textbooks at the CQUniversity Bookshop](#)

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Java Development Kit (JDK) 1.8 or later
- MySQL Database Server 5.7 or later
- NetBeans IDE
- Textpad editor

Schedule

Week 1 - 06 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
A Deeper Look at Classes and Objects	Chapters 8	

Week 2 - 13 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
Object Oriented Programming: Inheritance	Chapter 9	

Week 3 - 20 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Object Oriented Programming:
Polymorphism and Interfaces

Chapter 10

Week 4 - 27 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
Advanced GUI	Chapters 12 and 22	

Week 5 - 03 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
Exception Handling, Files, Streams and Object Serialization	Chapters 11 and 15	

Vacation Week - 10 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 17 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
Object-Oriented Design	Chapter 33 (online chapter): Object-Oriented Design with the UML	Assignment 1 Due: Week 6 Thursday (20 Apr 2017) 11:45 pm AEST

Week 7 - 24 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
Generic Collections and Iterators	Chapter 16	

Week 8 - 01 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Algorithmic Efficiency, Lambdas and Streams	Chapters 19 and 17	

Week 9 - 08 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Accessing Databases with JDBC	Chapter 24	

Week 10 - 15 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Generic Classes and Methods	Chapter 20	

Week 11 - 22 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Custom Generic Data Structures	Chapter 21	Assignment 2 Due: Week 11 Thursday (25 May 2017) 11:45 pm AEST

Week 12 - 29 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Recursion	Chapter 18	

Review/Exam Week - 05 Jun 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 12 Jun 2017

Module/Topic	Chapter	Events and Submissions/Topic

Assessment Tasks

1 Assignment 1

Assessment Type

Practical and Written Assessment

Task Description

In this assignment you will demonstrate your understanding of object oriented programming concepts in Java, and show an ability to develop a GUI (Graphical User Interface) based Java application. This assessment task is to design, code, debug, and test using the topics covered in Weeks 1-5. Further details are available on the unit website in the Assignment 1 Specification document.

Assessment Due Date

Week 6 Thursday (20 Apr 2017) 11:45 pm AEST

Return Date to Students

Week 9 Friday (12 May 2017)

Weighting

15%

Assessment Criteria

1. Efficient object-oriented program design.
2. Appropriate use of Graphical User Interface (GUI).
3. Appropriate use of data structures and algorithms in problem solving.
4. Effective use of good programming practice/techniques.
5. Rigorous testing of Java applications

Referencing Style

Submission Instructions

Learning Outcomes Assessed

- Choose and compare appropriate data structures in program design.
- Analyse, develop and implement software solutions with the focus of data structures and algorithms.
- Apply classes, inheritance, polymorphism and exception handling in the context of data structures and algorithms.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

2 Assignment 2

Assessment Type

Practical and Written Assessment

Task Description

In this assignment you will demonstrate your understanding of object oriented programming concepts and a variety of data structures and algorithms in Java, and show an ability to develop a GUI (Graphical User Interface) based Java application. This assessment task includes design, document, develop code, debug , and test a java application applying topics covered in Weeks 1 - 10. Further details are available on the Moodle unit website in the Assignment 2 specification document.

Assessment Due Date

Week 11 Thursday (25 May 2017) 11:45 pm AEST

Return Date to Students

Exam Week Wednesday (14 June 2017)

Weighting

30%

Assessment Criteria

1. Efficient object-oriented program design.
2. Appropriate use of Graphical User Interface (GUI).
3. Appropriate use of data types and algorithms in problem solving.
4. Effective use of good programming practice/techniques.
5. Rigorous testing of Java applications.
6. Effective evaluation of algorithms, data structures and program designs.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
