COIT20258 *Software Engineering*
Term 2 - 2019

Profile information current as at 05/05/2024 10:24 pm

General Information

Overview

This unit aims to teach you both theoretical and practical aspects of software engineering which involves specification, development, management and evolution of software systems. Theory will focus on software processes, requirements engineering, system models and modelling, robustness analysis, architectural design, object-oriented design, and software development methodology. The theoretical and practical aspects of software testing, software evolution, and quality management including quality assurance, and quality control are also discussed. You will also be introduced to the principles of software evolution and configuration management. This unit has a strong practical focus and the theoretical aspects are reinforced with practical work. The software engineering life cycle support functionality provided by modern software development environments is also addressed.

Details

Career Level: *Postgraduate*
Unit Level: *Level 9*
Credit Points: *6*
Student Contribution Band: *8*
Fraction of Full-Time Student Load: *0.125*

Pre-requisites or Co-requisites

Pre-requisites: COIT20247 Database Design and Development, COIT20256 Data Structures and Algorithms, and COIT20248 Information Systems Analysis and Design Anti-requisites: COIT20226 Software Design and Implementation Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure (Higher Education Coursework)](#).

Offerings For Term 2 - 2019

- Brisbane
- Melbourne
- Online
- Rockhampton
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment
Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Regional Campuses
Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

Metropolitan Campuses
Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview
1. **Practical Assessment**
Weighting: 20%
2. **Practical Assessment**
Weighting: 30%
3. **Examination**
Weighting: 50%

Assessment Grading
This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the University's Grades and Results Policy for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the CQUniversity Policy site.
You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the CQUniversity Policy site.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit coordinator's personal reflection.

Feedback

User interface development should reflect best practice.

Recommendation

Employ JavaFX rather than Swing both in the case studies and in the assignments.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Apply the principles of software design
2. Propose appropriate software management processes for a software engineering project
3. Employ Unified Modeling Language (UML) and design patterns in the design and documentation of software systems
4. Critique design alternatives and development methods available to a software developer
5. Design, develop, and test non-distributed, three layered software applications
6. Exploit the software engineering life cycle support functionality provided by modern software development environments.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.
ACS members can use the tool MySFIA to build a skills profile at
https://www.acs.org.au/professionalrecognition/mysfia-b2c.html
This unit contributes to the following workplace skills as defined by SFIA:

- Systems Design (DESN)
- System Integration (SINT)
- Programming/Software Development (PROG)
- Data Analysis (DTAN)
- Database/Repository Design (DBDS)
- Testing (TEST)
- Applications Support (ASUP)

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Schedule

Week 1 - 15 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Introduction; NetBeans	Chapter 1; Online Material	

Week 2 - 22 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Software Processes; Case Study 1 - AddressBook: Model/View (MV)	Chapter 2; Online Material	

Week 3 - 29 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Agile Software Development; Case Study 1 - AddressBook: Model/View/Presenter (MVP)	Chapter 3; Online Material	

Week 4 - 05 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Requirements Engineering; System Modelling	Chapter 4, Chapter 5	

Week 5 - 12 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Requirements Analysis; Unit testing	Online Material; Online material	

Vacation Week - 19 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic

Week 6 - 26 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Architectural Design; GUI, DB Design	Chapter 6; Online Material	**Assignment 1** Due: Week 6 Friday (30 Aug 2019) 11:55 pm AEST

Week 7 - 02 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Design and Implementation; Design Documents	Chapter 7; Online Material	

Week 8 - 09 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Design Principles; Case Study 1 - AddressBook: Model/View/Controller (MVC)	Online Material; Online Material	

Week 9 - 16 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Software Testing; Case Study 1 - AddressBook: Critique	Chapter 8; Online Material	

Week 10 - 23 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Software Evolution; Case Study 2 - Wumpus game: Specification	Chapter 9; Online Material	

Week 11 - 30 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Quality Management; Case Study 2 - Wumpus game: Design	Chapter 24; Online Material	**Assignment 2** Due: Week 11 Friday (4 Oct 2019) 11:55 pm AEST

Week 12 - 07 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
Configuration Management; Review	Chapter 25; Online Material	

Review/Exam Week - 14 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic

Exam Week - 21 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic

Assessment Tasks

1 Assignment 1

Assessment Type
Practical Assessment

Task Description
Students will implement a Java application that conforms to the MVP (Model View Presenter) pattern. The view will contain a Swing based GUI and the model will interact with a Java DB database. The specification of the system to be

built (including the design document) will be provided on the unit web site.

Assessment Due Date
Week 6 Friday (30 Aug 2019) 11:55 pm AEST

Return Date to Students

Two weeks after submission

Weighting
20%

Assessment Criteria

Criteria	Marks Available
Application class	1
Model + interface classes	4
View + interface classes	3
Presenter class	3
Layer interactions (Application/MVP, V/P, P/M, M/database)	4
Source code documentation / variable naming / code layout	2
Package structure	1
Acceptance tests (0 if any test fails)	2
Total	**20**

Referencing Style

- [Harvard (author-date)](#)

Submission
Online

Learning Outcomes Assessed

- Employ Unified Modeling Language (UML) and design patterns in the design and documentation of software systems
- Design, develop, and test non-distributed, three layered software applications
- Exploit the software engineering life cycle support functionality provided by modern software development environments.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management
- Ethical and Professional Responsibility

2 Assignment 2

Assessment Type
Practical Assessment

Task Description
Students will implement a revised specification for Assignment 1. New requirements will include conformance to the MVC (Model View Controller) pattern. The specification of the system to be built (including the design document) will be provided on the unit web site.

Assessment Due Date
Week 11 Friday (4 Oct 2019) 11:55 pm AEST

Return Date to Students

Two weeks after submission

Weighting
30%

Assessment Criteria

Criteria	Marks Available
Application class	2
Model + interface classes	6
View + interface classes	4
Controller class	2
Layer interactions (Application/MVC, V/C, C/M, M/V, M/database)	8
Source code documentation / variable naming / code layout	3
Package structure	1
Acceptance tests (0 if any test fails)	4
Total	**30**

Referencing Style

Submission
Online

Learning Outcomes Assessed

- Apply the principles of software design
- Employ Unified Modeling Language (UML) and design patterns in the design and documentation of software systems
- Design, develop, and test non-distributed, three layered software applications
- Exploit the software engineering life cycle support functionality provided by modern software development environments.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management
- Ethical and Professional Responsibility

Examination

Outline
Complete an invigilated examination.

Date
During the examination period at a CQUniversity examination centre.

Weighting
50%

Length
180 minutes

Exam Conditions
Open Book.

Materials
Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?
A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?
A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?
For academic advice and guidance, the Academic Learning Centre (ALC) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest
If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help
If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work
Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
