

COIT20259 Enterprise Computing Architecture

Term 2 - 2017

Profile information current as at 25/04/2024 06:01 am

All details in this unit profile for COIT20259 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to the components, architectures and industrial standards involved in the design and implementation of enterprise software applications. The focus will be on applications employing 3 tiers - a presentation tier, an application tier and a data persistence tier. In terms of technology, both traditional desktop applications and web-based applications will be covered and different technology platforms will be compared and contrasted. Emerging technologies and current research issues will also be discussed. Note: If you have completed COIT20227 Enterprise Computing then you cannot take this unit.

Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisites: COIT20256 Data Structures and Algorithms, COIT20247 Database Design and Development Co-requisite: COIT20257 Distributed Systems: Principles and Development, COIT20258 Software Design: Principles, Models and Patterns

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2017

- Brisbane
- Distance
- Melbourne
- Rockhampton
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Practical and Written Assessment**

Weighting: 40%

3. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student evaluation

Feedback

Development tools should not be restricted to specific.

Recommendation

Introduce and allow more development tools than the current Maven.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Compare and contrast the major enterprise software architectures.
2. Analyse and evaluate the design options available for each tier in a typical 3-tiered application.
3. Design and implement complex 3-tier applications.
4. Assess the potential business impact of emerging enterprise computing technologies.
5. Critically evaluate key research areas in enterprise computing.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.

ACS members can use the tool MySFIA to build a skills profile at

<https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>

This unit contributes to the following workplace skills as defined by SFIA. The SFIA code is included:

- Systems Design (DESN)
- Systems integration (SINT)
- Programming/Software Development (PROG)
- Data analysis (DTAN)
- Database/repository design (DBDS)
- Testing (TEST), Network support (NTAS)
- Release and deployment (RELM)
- Application support (ASUP).

Assessment Tasks

1 Assignment 1

Assessment Type

Written Assessment

Task Description

Your task for this assignment is to write a technical report on the topic of Review Enterprise Computing Platforms: Java EE, .NET and Cloud, which are the technology to build, deploy and maintain multi-tier enterprise applications. The purpose of this assignment is to assess your competency in review and critique of a technical issue and writing a formal academic report.

The assignment specification and marking criteria can be found from the unit web site.

Assessment Due Date

Week 5 Friday (11 Aug 2017) 11:45 pm AEST

Assignment-1 Due

Return Date to Students

Week 6 Friday (25 Aug 2017)

Assignment-1 Results Release

Weighting

20%

Assessment Criteria

The assignment will be assessed by the format, technical contents and referencing of the report. The detailed marking criteria can be found from the unit web site.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit from the unit Moodle site

Learning Outcomes Assessed

- Compare and contrast the major enterprise software architectures.
- Analyse and evaluate the design options available for each tier in a typical 3-tiered application.
- Assess the potential business impact of emerging enterprise computing technologies.
- Critically evaluate key research areas in enterprise computing.

Graduate Attributes

- Knowledge
- Communication
- Research

2 Assignment 2

Assessment Type

Practical and Written Assessment

Task Description

Your task for this assignment is to design, implement, test and document a 3-tier enterprise application system. The purpose of this assignment is to assess your competency in enterprise computing paradigm, JSF, EJB and JPA programming and the interoperations between layers of an enterprise application.

The assignment specification and marking criteria can be found from the unit web site.

Assessment Due Date

Week 11 Friday (29 Sept 2017) 11:45 pm AEST

Assignment-2 Due

Return Date to Students

Review/Exam Week Friday (13 Oct 2017)

Assignment-2 Results Release

Weighting

40%

Assessment Criteria

The assignment will be assessed by the design and test document and the software implementation. The detailed marking criteria can be found from the unit web site.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit from the unit Moodle site

Learning Outcomes Assessed

- Analyse and evaluate the design options available for each tier in a typical 3-tiered application.
- Design and implement complex 3-tier applications.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

40%

Length

120 minutes

Exam Conditions

Open Book.

Materials

Calculator - non-programmable, no text retrieval, silent only

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
