

COIT20259 Enterprise Computing Architecture

Term 2 - 2022

Profile information current as at 01/05/2024 12:14 pm

All details in this unit profile for COIT20259 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to the components, architectures and industrial standards involved in the design and implementation of enterprise software applications. The focus will be on applications employing 3 tiers including a presentation tier, an application tier and a data persistence tier. You will work in a small team for the design and development of a 3-tier enterprise application project. In terms of technology, both traditional desktop applications and web-based applications will be covered and different technology platforms will be compared and contrasted. Emerging technologies and current research issues will be discussed.

Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisites: COIT20256 Data Structures and Algorithms, COIT20247 Database Design and Development Co-requisites: COIT20257 Distributed Systems: Principles and Development, COIT20258 Software Engineering

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2022

- Brisbane
- Melbourne
- Online
- Rockhampton
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Practical and Written Assessment**

Weighting: 50%

3. **Written Assessment**

Weighting: 30%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Coordinator reflection

Feedback

Industry are moving to newer versions of Java Enterprise Edition

Recommendation

Update the unit from Java EE 8 to the latest Jakarta EE 9 to keep up with the technology advancement

Feedback from Coordinator reflection

Feedback

Maintain an evolvable technical structure of the unit

Recommendation

The three tier (persistence, business, and presentation) architecture needs to be kept as a complete backbone for the unit. The industry's new released techniques (such as microservices) can be updated on the basis of the backbone.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Compare and contrast the major enterprise software architectures
2. Analyse and evaluate the design options available for a given scenario depicting a complex enterprise problem
3. Design and implement complex 3-tier applications
4. Work collaboratively and communicate effectively as part of a productive team
5. Assess the potential impact of emerging enterprise computing technologies to various stakeholders
6. Critically evaluate key research areas in enterprise computing.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.

ACS members can use the tool MySFIA to build a skills profile at

<https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>

This unit contributes to the following workplace skills as defined by SFIA. The SFIA code is included:

- Systems Design (DESN)
- Software Design (SWDN)
- Programming/Software Development (PROG)
- Data modelling and design (DTAN)
- Database design (DBDS)
- User experience design (HCEV)
- Testing (TEST)
- Release and deployment (RELM)
- Application support (ASUP).

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes					
	1	2	3	4	5	6
1 - Written Assessment - 20%	•				•	•
2 - Practical and Written Assessment - 50%		•	•	•		
3 - Written Assessment - 30%	•	•			•	•

Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes

Schedule

Week 1 - 11 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Enterprise Computing & Java EE	1 & 4	

Week 2 - 18 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Object-Relational Mapping	5	

Week 3 - 25 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Managing Persistent Objects	5 & 6	

Week 4 - 01 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Callbacks and Listeners	6	

Week 5 - 08 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Enterprise Java Beans	7	Assignment 1 Due: Week 5 Friday (12 Aug 2022) 11:59 pm AEST

Vacation Week - 15 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Vacation		

Week 6 - 22 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Session Beans	7 & 8	

Week 7 - 29 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Callbacks, Timer Service and Authorization	8	

Week 8 - 05 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
JavaServer Faces	10	

Week 9 - 12 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Pages and Components	10	

Week 10 - 19 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Processing and Navigation	11	

Week 11 - 26 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Restful Web Service	15	Assignment 2 Due: Week 11 Friday (30 Sept 2022) 11:59 pm AEST

Week 12 - 03 Oct 2022

Module/Topic	Chapter	Events and Submissions/Topic
Messaging	13	

Review/Exam Week - 10 Oct 2022

Term Specific Information

The unit coordinator of this term is:

Dr. Wei Li

School of Engineering & Technology

Central Queensland University

Rockhampton QLD 4702, Australia

Phone: +61 7 4930 9686

Email: w.li@cqu.edu.au

Assessment Tasks

1 Assignment 1

Assessment Type

Written Assessment

Task Description

Your task for this assignment is to write a research report to critically review the current enterprise computing architecture: Big Data Ecosystems. The purpose of this assignment is to assess your review competence on the basis of critiquing ability, clarification of technical issues and formal academic report writing.

The assignment specification and marking criteria can be accessed from the unit Moodle site.

Assessment Due Date

Week 5 Friday (12 Aug 2022) 11:59 pm AEST

Assignment 1 Due

Return Date to Students

Week 6 Friday (26 Aug 2022)

Assignment 1 Results Release

Weighting

20%

Assessment Criteria

The students are assessed mainly against formatting, technical content and citation quality of the report. The detailed marking criteria can be accessed on the unit Moodle site.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must submit your assignment via the online submission system from the unit Moodle site.

Learning Outcomes Assessed

- Compare and contrast the major enterprise software architectures
- Assess the potential impact of emerging enterprise computing technologies to various stakeholders
- Critically evaluate key research areas in enterprise computing.

Graduate Attributes

- Knowledge
- Communication
- Research

2 Assignment 2

Assessment Type

Practical and Written Assessment

Task Description

You will be tasked with a team-based software development project. You will be part of a small team to design, implement, test and document a three-tier enterprise application system. The purpose of this assignment is to assess your competence in enterprise computing paradigms, including Java ServerFaces (JSF), Enterprise Java Beans (EJB) and Java Persistence API (JPA) programming, and the interoperations between layers of an enterprise application. Your ability to work collaboratively in a small team will also be assessed by this assignment. The assignment specification and marking criteria can be accessed on the unit Moodle site.

Assessment Due Date

Week 11 Friday (30 Sept 2022) 11:59 pm AEST
Assignment 2 Due

Return Date to Students

Review/Exam Week Friday (14 Oct 2022)
Assignment 2 Results Release

Weighting

50%

Assessment Criteria

The students are assessed mainly against their documentation (design and test) quality, software implementation correctness and team work report. The detailed marking criteria can be accessed on the unit Moodle site.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must submit your assignment via the online submission system from the unit Moodle site.

Learning Outcomes Assessed

- Analyse and evaluate the design options available for a given scenario depicting a complex enterprise problem
- Design and implement complex 3-tier applications
- Work collaboratively and communicate effectively as part of a productive team

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management
- Ethical and Professional Responsibility
- Leadership

3 Assignment 3

Assessment Type

Written Assessment

Task Description

Your task for this assignment is to address a number of theoretical issues in the area of enterprise computing architecture. The purpose of this assignment is to assess your understanding and competence to apply the theoretical principles in enterprise computing.

The assignment specification and marking criteria can be accessed on the unit Moodle site.

Assessment Due Date

Review/Exam Week Friday (14 Oct 2022) 11:59 pm AEST
Assignment 3 Due

Return Date to Students

The marked assignment will be returned on the day of Certification of Grades

Weighting

30%

Assessment Criteria

The students are assessed mainly against their understanding to the given theoretical issues and competence to apply

the theoretical principles. The detailed marking criteria can be accessed from the unit Moodle site.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

You must submit your assignment via the online submission system from the unit Moodle site.

Learning Outcomes Assessed

- Compare and contrast the major enterprise software architectures
- Analyse and evaluate the design options available for a given scenario depicting a complex enterprise problem
- Assess the potential impact of emerging enterprise computing technologies to various stakeholders
- Critically evaluate key research areas in enterprise computing.

Graduate Attributes

- Knowledge
- Communication
- Research

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
