## General Information

### Overview

In this unit, you will learn how to develop a mobile game using an agile methodology and device agnostic software tools. You will look at using 3D models and sound assets to develop this game, as well as techniques for good game development. This development process highlights, in particular, the impact that limited computing resources and wireless communication speeds have on the development of games. You will also conduct research on what makes a good game, supported by relevant gaming theories.
