

COIT20272 *Mobile App Development Project*

Term 1 - 2018

Profile information current as at 28/04/2024 07:49 pm

All details in this unit profile for COIT20272 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this integrative capstone project, students develop a significant and authentic mobile application. Students employ the technical and professional skills that they have developed in earlier IT units to contribute to the development of an authentic web, hybrid or native app. They are required to use and document typical project management processes to ensure that the project is delivered on time and budget.

Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: *12*

Student Contribution Band: *8*

Fraction of Full-Time Student Load: *0.25*

Pre-requisites or Co-requisites

Pre-Reqs: COIT20268 Responsive Web Design, COIT20269 Mobile Web Apps, COIT20270 App Development for Mobile Platforms, PPMP20007 Project Management Concepts

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2018

- Brisbane
- Distance
- Melbourne
- Rockhampton
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 12-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 25 hours of study per week, making a total of 300 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 15%

2. **Written Assessment**

Weighting: 10%

3. **Presentation and Written Assessment**

Weighting: 25%

4. **Written Assessment**

Weighting: 10%

5. **Practical and Written Assessment**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Classroom discussion

Feedback

Students indicated they enjoyed the ability to develop their own individual project as part of the unit and found it useful.

Recommendation

Continue allowing students to select their own projects for future offerings.

Feedback from Observation

Feedback

Some students struggled with the project nature of the unit and the replacement of lectures with a weekly project meeting.

Recommendation

Consider providing scaffolding in week 1 on the nature of the unit and the relationship of this type of project unit to the project work students will conduct in the industry (i.e. meetings rather than lectures, more self-driven goal setting).

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Apply a systems engineering process, including requirement analysis, application software design, algorithm design, coding and debugging, software testing, and software project management, informed by research into best practice.
2. Demonstrate professional standards of software development including technical skills, documentation, software quality assurance, risk mitigation strategies and ethics.
3. Plan and manage the software development project, particularly the scheduling of time and resources and the generation of supporting documentation.
4. Work collaboratively as part of a productive team.
5. Communicate effectively by using written and oral presentation, understanding the needs of various stakeholders.
6. Review and critically evaluate team and individual performance, reflecting on the processes followed and identifying areas for improvement.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.

ACS members can use the tool MySFIA to build a skills profile at <https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>

This unit contributes to the following workplace skills as defined by SFIA. The SFIA code is included:

- Software Development Process Improvement (SPIM)
- Project Management (PRMG)
- Systems Design (DESN)
- System Integration (SINT)
- Program ming/Software Development (PROG)
- Data Analysis (DTAN)
- Database/Repository Design (DBDS)
- Systems Development Management (DLMG)
- Testing (TEST), Network Support (NTAS)
- Release and Deployment (RELM)
- Applications Support (ASUP)

Textbooks and Resources

Textbooks

There are no required textbooks.

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Android studio (latest version)
- Access to MySQL Database Server or SQLite database (Mandatory)

Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)
For further information, see the Assessment Tasks.

Schedule

Week 1 - 05 Mar 2018

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to Software Engineering	Chapter 1 <ul style="list-style-type: none"> • Section 1.1 What is Software Engineering? • Section 1.2 Software Engineering Life-cycle • Section 1.4 The Object Model 	<ul style="list-style-type: none"> • Read and discuss the recommended sections of Chapter 1 of the reference textbook • Form project group, identify and discuss project topic

Week 2 - 12 Mar 2018

Module/Topic	Chapter	Events and Submissions/Topic
Object Oriented Software Engineering	Chapter 2 <ul style="list-style-type: none"> • Section 2.1 Software Development Methods • Section 2.2 Requirement Engineering • Section 2.3 Software Architecture 	<ul style="list-style-type: none"> • Read and discuss the recommended sections of Chapter 2 of the reference textbook • Finalize project topic and scope • Work on project proposal

Week 3 - 19 Mar 2018

Module/Topic	Chapter	Events and Submissions/Topic
Use Case Analysis and Modeling	Chapter 2 Section 2.4 Use Case Modeling	<ul style="list-style-type: none"> • Read and discuss the recommended sections of Chapter 2 of the reference textbook • Finalize project proposal • Submit project proposal <p>Project Proposal and Project Plan Due: Week 3 Friday (23 Mar 2018) 11:45 pm AEST</p>

Week 4 - 26 Mar 2018

Module/Topic	Chapter	Events and Submissions/Topic
Use Case Analysis and Modeling	Continue Chapter 2 Section 2.4 Use Case Modeling	Read and discuss the recommended section of Chapter 2 of the reference textbook.

Week 5 - 02 Apr 2018

Module/Topic	Chapter	Events and Submissions/Topic
Use Case Analysis and Modeling	Chapter 2 <ul style="list-style-type: none"> • Focus on design and class diagrams • Focus on software testing (2.6 Test-driven implementation) 	<ul style="list-style-type: none"> • Read and discuss the recommended sections of Chapter 2 the reference textbook • Submit Assessment 2A (Periodic Project Progress Report) <p>Periodic Project Progress Reports Due: Week 5 Friday (6 Apr 2018) 11:45 pm AEST</p>

Vacation Week - 09 Apr 2018

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 16 Apr 2018

Module/Topic	Chapter	Events and Submissions/Topic
Modeling and System Specification	Chapter 3 Section 3.1 What is a system? Section 3.2 Notation for System Specification	Read and discuss the recommended sections of Chapter 3 of the reference textbook.

Week 7 - 23 Apr 2018

Module/Topic	Chapter	Events and Submissions/Topic
		1. In-class presentation and online submission of Project Requirement Specification and Design Documents 2. Submit Assessment 2B (Periodic Project Progress Report)
		<p>In-class presentation of Project Requirement Specification and Design Documents Due: Week 7 Friday (27 Apr 2018) 9:00 pm AEST</p>

Week 8 - 30 Apr 2018

Module/Topic	Chapter	Events and Submissions/Topic
Future Trends	Chapter 9 Sections 9.4 Software-as-a-Service (SaaS) Sections 9.5 End user software development	Read and discuss the recommended sections of Chapter 9 of the reference textbook.

Week 9 - 07 May 2018

Module/Topic	Chapter	Events and Submissions/Topic
		Submit Assessment 2C (Periodic Project Progress Report)

Week 10 - 14 May 2018

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 11 - 21 May 2018

Module/Topic	Chapter	Events and Submissions/Topic
		<ul style="list-style-type: none"> • In-class presentation and demonstration of final project products or outcomes • Submit Assessment 2D (Periodic Project Progress Report) <p>In-class presentation and demonstration of final project products or outcomes Due: Week 11 Friday (25 May 2018) 9:00 pm AEST</p>

Week 12 - 28 May 2018

Module/Topic	Chapter	Events and Submissions/Topic
		<p>Submit the final project (program codes, database schema, application execution file, and project documents)</p> <p>Submission of final project (program codes, database schema, application execution file, and project documents) Due: Week 12 Friday (1 June 2018) 11:45 pm AEST</p>

Exam Week - 11 Jun 2018

Module/Topic	Chapter	Events and Submissions/Topic
This course does not have any examination.

Assessment Tasks

1 Project Proposal and Project Plan

Assessment Type

Written Assessment

Task Description

This is a group assessment. In this assessment, you are required to include following 5 components or sections:

1. Project charter
2. Project plan
3. Risk management plan
4. User requirements
5. Quality assurance plan

The detail specification of this assessment will be provided in the Moodle course website.

Assessment Due Date

Week 3 Friday (23 Mar 2018) 11:45 pm AEST

Return Date to Students

Week 5 Friday (6 Apr 2018)

Weighting

15%

Assessment Criteria

The assessment specification and marking criteria will be provided in the Moodle course website.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online Group

Submission Instructions

Your submission (1 Microsoft Word document) must include all 5 components or sections outlined in the assessment criteria. This is a group submission. All group members must submit the same copy of assignment. The report must clearly indicate the details of the member group (Student ID and Full name).

Learning Outcomes Assessed

- Apply a systems engineering process, including requirement analysis, application software design, algorithm design, coding and debugging, software testing, and software project management, informed by research into best practice.
- Demonstrate professional standards of software development including technical skills, documentation, software quality assurance, risk mitigation strategies and ethics.
- Plan and manage the software development project, particularly the scheduling of time and resources and the generation of supporting documentation.
- Work collaboratively as part of a productive team.
- Communicate effectively by using written and oral presentation, understanding the needs of various stakeholders.
- Review and critically evaluate team and individual performance, reflecting on the processes followed and identifying areas for improvement.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Research
- Self-management

2 Periodic Project Progress Reports

Assessment Type

Written Assessment

Task Description

This is a group assessment. You (and your group) are required to submitted four Periodic Project Progress Report (2A, 2B, 2C, and 2D). Each progress report weighs 2.5 marks (totaling 10 marks for all project progress reports). All four reports must be presented using the standard template file provided in the Moodle course website.

The detail specification of this assessment will be provided in the Moodle course website.

The submission due dates for all 4 progress reports are as below:

Project Progress Report 1 (Assessment 2A)	Friday of Week 5 (11:45 PM)
Project Progress Report 2 (Assessment 2B)	Friday of Week 7 (11:45 PM)
Project Progress Report 3 (Assessment 2A)	Friday of Week 9 (11:45 PM)
Project Progress Report 4 (Assessment 2A)	Friday of Week 11 (11:45 PM)

Assessment Due Date

Week 5 Friday (6 Apr 2018) 11:45 pm AEST

Return Date to Students

Week 7 Monday (23 Apr 2018)

Weighting

10%

Assessment Criteria

The assessment specification and marking criteria will be provided in the Moodle course website.

Learning Outcomes Assessed

- Plan and manage the software development project, particularly the scheduling of time and resources and the generation of supporting documentation.

Graduate Attributes

- Knowledge
- Communication
- Self-management
- Leadership

3 In-class presentation of Project Requirement Specification and Design Documents

Assessment Type

Presentation and Written Assessment

Task Description

This is a group assessment. All members of teams will give in-class presentation (for 15-20 minutes each group). All presentation slides should be prepared using Microsoft PowerPoint or other presentation software. Each member of the team **MUST** present his/her work in the project.

This assessment presents two components:

1. In-class presentation (5% mark)
2. Project specification and design documents (20%)

This presentation must cover the project requirement specification, and design documents

Requirement specification section should include (a) A list of functional requirements (b) A list of non-functional requirements (c) Use-case diagrams (UML) (d) Textual description of Use-case diagrams (e) Mapping of requirements to use-cases

Design section should include: a. Software architecture clearly depicting all components b. Class diagram containing all classes (using UML notations) c. Behavioural modelling d. Data dictionary e. Entity Relationship Diagram (ERD) f.

Wireframes of all user interfaces

Each member of the group must submit the Microsoft Word document of above items (1) and (2) as the detailed system specification and design document.

Assessment Due Date

Week 7 Friday (27 Apr 2018) 9:00 pm AEST

This presentation will be held during Week-7. The local Project Mentor (or the Lecturer) will schedule the day and time of the presentation. The Unit Coordinator will make separate provisions for the off-campus or distance students.

Return Date to Students

Week 9 Friday (11 May 2018)

Weighting

25%

Assessment Criteria

The assessment specification and marking criteria will be provided in the Moodle course website.

Referencing Style

- Cognitive, technical and creative skills
- Research
- Self-management
- Ethical and Professional Responsibility
- Leadership

4 In-class presentation and demonstration of final project products or outcomes

Assessment Type

Written Assessment

Task Description

This in-class presentation is a group work. Each member of the group **MUST** give presentation. The presentation will cover:

1. Demonstration of fully running Android App
2. Presentation of the draft version of their final project report

Each group will have 20-30 minutes to present above items to the plenary.

With (1) above, it is advised that each group must install their app in other participant's Android phone devices prior to deliver the presentation.

With (2) above, each group also must present their final project report (covering all aspects of projects such as the project charter, plan, formal and non-formal requirement specifications, design documents - model diagrams, user interfaces, reports; lessons learnt)

Assessment Due Date

Week 11 Friday (25 May 2018) 9:00 pm AEST

This presentation will be held during Week-7. The local Project Mentor (or the Lecturer) will schedule the day and time of the presentation. The Unit Coordinator will make separate provisions for the off-campus or distance students.

identifying areas for improvement.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Ethical and Professional Responsibility

5 Submission of final project (program codes, database schema, application execution file, and project documents)

Assessment Type

Practical and Written Assessment

Task Description

This is a group assessment. Each group must submit following items in a single ZIP file:

1. The Project Report (1 Microsoft Word file – no word limitations will apply)
2. App program codes (ZIP file). The fully running application. The submission should also contain an Android .apk file.
3. Database schema (a .sql dump file, if any external database such as MySQL was used). This schema file must be submitted as a plain text document saved in any standard text editor such as Notepad, Notepad++, TextEdit. Please do not submit this schema in Microsoft Word document.

Note: the Project Report will include (but not limited to) following:

1. Cover page
2. Table of content
3. Project information
 - a. Introduction
 - b. Aims/objectives/scopes
4. Design documents
 - a. User requirements
 - b. Context diagram
 - c. Use cases
 - d. Class diagram
 - e. . Behavioural or UML Activity Diagram
 - f. User interface wireframes
 - g. Database design (schema)
5. Test plans and test results (in tabular forms)
 - a. Test plan (indicating test scenario including validations)
 - b. Test results (showing all anticipated results and actual results)
6. User manual (detailing how to operate the system)
7. References (if any)

Assessment Due Date

Week 12 Friday (1 June 2018) 11:45 pm AEST

- Ethical and Professional Responsibility
- Leadership

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
