

# **COIT20277 *Introduction to Artificial Intelligence***

## **Term 1 - 2020**

Profile information current as at 04/05/2024 06:07 pm

All details in this unit profile for COIT20277 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

### **Corrections**

#### **Unit Profile Correction added on 24-04-20**

The end of term examination has now been changed to an alternate form of assessment. Please see the Moodle Unit website for details of the assessment.

## General Information

### Overview

Artificial intelligence is closely related to the field called soft computing which provides a foundation for the conception, design, and deployment of intelligent systems directed towards intelligence and autonomy. This unit introduces you to the fundamental concepts of artificial intelligence in the three prominent areas of fuzzy systems, artificial neural networks, and evolutionary computation. You will be introduced to topics of genetic algorithms, evolutionary programming, and genetic programming. You will also be introduced to the most commonly used neural network paradigms. You will learn the concepts of fuzzy sets and fuzzy logic, and approximate reasoning, as part of fuzzy systems. The theoretical concepts will be reinforced with hands-on experience during computer lab tutorials.

### Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

### Pre-requisites or Co-requisites

Pre-requisite: COIT20245 Introduction To Programming

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

### Offerings For Term 1 - 2020

- Brisbane
- Melbourne
- Online
- Sydney

### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Written Assessment**

Weighting: 20%

#### 2. **Written Assessment**

Weighting: 20%

#### 3. **Written Assessment**

Weighting: 20%

#### 4. **Examination**

Weighting: 40%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Student evaluation

##### Feedback

Students found this really challenging with mathematical equations.

##### Recommendation

Provide more explanations in lecture slides.

## Unit Learning Outcomes

### On successful completion of this unit, you will be able to:

1. Model, design, and develop solutions to hypothetical problems applying the fundamental principles of evolutionary computation
2. Apply the basic concepts of artificial neural networks to create solutions to hypothetical problems
3. Analyse and solve example problems using fuzzy logic, fuzzy set theory, and approximate reasoning.

Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA is in use in over 100 countries and provides a widely used and consistent definition of ICT skills. SFIA is increasingly being used when developing job descriptions and role profiles.

This unit contributes to the following workplace skills as defined by SFIA. The SFIA code is included:

- Systems Integration (SINT)
- Programming/Software Development (PROG)
- Testing (TEST)
- Application Support (ASUP)

ACS members can use the tool MySFIA to build a skills profile at <https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

### Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes		
	1	2	3
1 - Written Assessment - 20%	•		
2 - Written Assessment - 20%		•	
3 - Written Assessment - 20%			•
4 - Examination - 40%	•	•	•

## Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes		
	1	2	3
1 - Knowledge	○	○	○
2 - Communication	○	○	○
3 - Cognitive, technical and creative skills	○	○	○
4 - Research			
5 - Self-management	○	○	○
6 - Ethical and Professional Responsibility			
7 - Leadership			
8 - Aboriginal and Torres Strait Islander Cultures			

## Alignment of Assessment Tasks to Graduate Attributes

Assessment Tasks	Graduate Attributes							
	1	2	3	4	5	6	7	8
1 - Written Assessment - 20%	○	○	○		○			
2 - Written Assessment - 20%	○	○	○		○			
3 - Written Assessment - 20%	○	○	○		○			
4 - Examination - 40%	○	○	○					

## Textbooks and Resources

### Textbooks

COIT20277

#### Prescribed

#### Computational Intelligence: Concepts to Implementations (2007)

Authors: Russell C. Eberhart, Yuhui Shi  
Morgan Kaufmann Publishers  
Burlington , MA , USA  
ISBN: 978-1-55860-759-0  
Binding: Hardcover

#### Additional Textbook Information

Copies can be purchased from the CQUni Bookshop here: <http://bookshop.cqu.edu.au> (search on the Unit code)

[View textbooks at the CQUniversity Bookshop](#)

### IT Resources

**You will need access to the following IT resources:**

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- R Studio and R
- Java SE 11
- NetBeans IDE 11

## Referencing Style

**All submissions for this unit must use the referencing styles below:**

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)
- [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

## Teaching Contacts

**Mary Tom** Unit Coordinator

## Schedule

### Week 1 - 09 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Evolutionary Computation Concepts and Paradigms	Chapter 2 and Part of Chapter 3	

### Week 2 - 16 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Evolutionary Algorithms: Representation	Chapter 3, and Chapter 3 and 4 from Introduction to Evolutionary Computing by A. E. Eiben and J. E. Smith	

**Week 3 - 23 Mar 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Fitness Selection and Population management	5 Introduction to Evolutionary Computing by A. E. Eiben and J. E. Smith	

**Week 4 - 30 Mar 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Neural Networks: Components and Terminology	Chapter 5	

**Week 5 - 06 Apr 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Neural Networks: Adaptation and Learning	Chapter 5	<b>Assignment 1</b> Due: Week 5 Tuesday (7 Apr 2020) 11:45 pm AEST

**Vacation Week - 13 Apr 2020**

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

**Week 6 - 20 Apr 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Neural Networks: Adaptation and Implementation	5 and 6	

**Week 7 - 27 Apr 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Fuzzy Sets and Fuzzy Logic	Chapter 7	

**Week 8 - 04 May 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Approximate Reasoning	Chapter 7	<b>Assignment 2</b> Due: Week 8 Tuesday (5 May 2020) 11:45 pm AEST

**Week 9 - 11 May 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Decision Making	Chapter 15 <i>Fuzzy sets and fuzzy logic</i> (Vol. 4) Klir, G. and Yuan, B., 1995.	

**Week 10 - 18 May 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Fuzzy Controller	7	

**Week 11 - 25 May 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Implementations	Chapter 8	

**Week 12 - 01 Jun 2020**

Module/Topic	Chapter	Events and Submissions/Topic
Performance Metrics	Chapter 10	<b>Assignment 3</b> Due: Week 12 Tuesday (2 June 2020) 11:45 pm AEST

**Review/Exam Week - 08 Jun 2020**

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

**Exam Week - 15 Jun 2020**

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

## Term Specific Information

### Unit Coordinator

Dr. Mary Tom  
School of Engineering & Technology  
Central Queensland University  
Brisbane QLD 4000, Australia  
**Phone: +61 7 3295 1119**

## Assessment Tasks

### 1 Assignment 1

#### Assessment Type

Written Assessment

#### Task Description

In this assignment you will demonstrate your ability to apply evolutionary computing concepts to hypothetical problem, and develop a software application. This assessment task is to design, code, debug, and test using the topics covered in Weeks 1-3. Further details are in the Assignment 1 Specification document available from the Unit website.

#### Assessment Due Date

Week 5 Tuesday (7 Apr 2020) 11:45 pm AEST

#### Return Date to Students

Week 7 Tuesday (28 Apr 2020)

#### Weighting

20%

#### Assessment Criteria

1. Appropriate application of evolutionary computation concepts to the given problem
2. Correct modelling of problem solution following evolutionary computation concepts
3. Effective Source code development applying correct algorithmic steps
4. Effective use of good programming practice/techniques
5. Rigorous testing to evaluate the correctness of the model and algorithm
6. Demonstration of potential practical applications in a written report

#### Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)
- [Harvard \(author-date\)](#)

#### Submission

Online

#### Submission Instructions

Submit only one zip file (.zip) containing the source code files (.java) and document file (.doc or .docx).

#### Learning Outcomes Assessed

- Model, design, and develop solutions to hypothetical problems applying the fundamental principles of evolutionary computation

#### Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

### 2 Assignment 2

**Assessment Type**

Written Assessment

**Task Description**

In this assignment you will demonstrate your ability to model a neural network to solve a hypothetical problem, and develop a software application implementing your model. This assessment task is to design, code, debug, and test using the topics covered in Weeks 4-6. Further details are available in the Assignment 2 Specification document available from the Unit website.

**Assessment Due Date**

Week 8 Tuesday (5 May 2020) 11:45 pm AEST

**Return Date to Students**

Week 10 Tuesday (19 May 2020)

**Weighting**

20%

**Assessment Criteria**

1. Correct modelling of problem solution following artificial neural network concepts
2. Effective Source code development applying correct algorithmic steps
3. Effective use of good programming practice/techniques
4. Rigorous testing to evaluate the correctness of the model and algorithm
5. Demonstration of potential practical applications in a written report

**Referencing Style**

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)
- [Harvard \(author-date\)](#)

**Submission**

Online

**Submission Instructions**

Submit a zip file (.zip) containing the source code files (.java) and the report document file (.doc or .docx).

**Learning Outcomes Assessed**

- Apply the basic concepts of artificial neural networks to create solutions to hypothetical problems

**Graduate Attributes**

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

### 3 Assignment 3

**Assessment Type**

Written Assessment

**Task Description**

In this assignment you will demonstrate your problem solving and programming skills to apply fuzzy system concepts to a hypothetical problem, and develop a software application. This assessment task is to design, code, debug, and test using the topics covered in Weeks 7-11. Further details are in the Assignment 3 Specification document available from the Unit website.

**Assessment Due Date**

Week 12 Tuesday (2 June 2020) 11:45 pm AEST

**Return Date to Students**

Review/Exam Week Thursday (11 June 2020)

**Weighting**

20%

**Assessment Criteria**

1. Correct modelling of problem solution following fuzzy system concepts
2. Effective Source code development for correct implementation of the model
3. Effective use of good programming practice/techniques

4. Rigorous testing to evaluate the correctness of the model and algorithm
5. Suggestions to enhance the model combining one more computational intelligence technique to improve speed/accuracy
6. Write a report on applicability of the enhanced model in real world applications that will also promote social innovation

### Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)
- [Harvard \(author-date\)](#)

### Submission

Online

### Submission Instructions

Submit a zip file (.zip) containing the source code files (.java) and the report document file (.doc or .docx).

### Learning Outcomes Assessed

- Analyse and solve example problems using fuzzy logic, fuzzy set theory, and approximate reasoning.

### Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

## Examination

### Outline

Complete an invigilated examination.

### Date

During the examination period at a CQUniversity examination centre.

### Weighting

40%

### Length

120 minutes

### Exam Conditions

Open Book.

### Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
