

COIT20277 *Introduction to Artificial Intelligence*

Term 2 - 2021

Profile information current as at 23/04/2024 10:15 pm

All details in this unit profile for COIT20277 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Artificial intelligence is closely related to the field called soft computing which provides a foundation for the conception, design, and deployment of intelligent systems directed towards intelligence and autonomy. This unit introduces you to the fundamental concepts of artificial intelligence in the three prominent areas of fuzzy systems, artificial neural networks, and evolutionary computation. You will be introduced to topics of genetic algorithms, evolutionary programming, and genetic programming. You will also be introduced to the most commonly used neural network paradigms. You will learn the concepts of fuzzy sets and fuzzy logic, and approximate reasoning, as part of fuzzy systems. The theoretical concepts will be reinforced with hands-on experience during computer lab tutorials.

Details

Career Level: *Postgraduate*

Unit Level: *Level 9*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite: COIT20245 Introduction to Programming

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2021

- Brisbane
- Melbourne
- Online
- Sydney

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 30%

2. **Written Assessment**

Weighting: 25%

3. **Written Assessment**

Weighting: 45%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Self reflection

Feedback

Add more examples in the tutorial questions.

Recommendation

Students were very eager and engaged to work with examples related to the theory. Hence, more examples can be added to the tutorial questions.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Model internal representation, performance criteria, and computational components identifying elements of authentic problems to apply neural, fuzzy or evolutionary computation
2. Create effective and efficient computational intelligence solutions to authentic problems
3. Evaluate the solution to a computational intelligence problem, analysing the merits and demerits of the chosen approach
4. Investigate the potential to enhance the model using one or more computational intelligence techniques.

The Australian Computer Society (ACS) recognises the Skills Framework for the Information Age (SFIA). SFIA provides a consistent definition of ICT skills. SFIA is adopted by organisations, governments, and individuals in many countries and is increasingly used when developing job descriptions and role profiles.

ACS members can use the tool MySFIA to build a skills profile at <https://www.acs.org.au/professionalrecognition/mysfia-b2c.html>.

This unit contributes to the following workplace skills as defined by SFIA. The SFIA code is included:

- Data modelling and design (DTAN)
- Software design (SWDN)
- Programming/Software Development (PROG)
- Testing (TEST)
- Application Support (ASUP)

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Schedule

Week 1 - 12 Jul 2021

Module/Topic	Chapter	Events and Submissions/Topic
Evolutionary Computation Concepts and Paradigms	Chapter 2 and Part of Chapter 3 (Prescribed Textbook)	

Week 2 - 19 Jul 2021

Module/Topic	Chapter	Events and Submissions/Topic
Evolutionary Algorithms: Representation	Chapter 3 (Prescribed Textbook), and Chapter 3 and 4 from Introduction to Evolutionary Computing by A. E. Eiben and J. E. Smith	

Week 3 - 26 Jul 2021

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Fitness Selection and Population management Chapter 5 from Introduction to Evolutionary Computing by A. E. Eiben and J. E. Smith

Week 4 - 02 Aug 2021

Module/Topic	Chapter	Events and Submissions/Topic
Neural Networks: Components and Terminology	Chapter 5 (Prescribed Textbook)	

Week 5 - 09 Aug 2021

Module/Topic	Chapter	Events and Submissions/Topic
Neural Networks: Adaptation and Learning	Chapter 5 (Prescribed Textbook)	Written Assessment Due: Week 5 Friday (13 Aug 2021) 11:00 pm AEST

Vacation Week - 16 Aug 2021

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 23 Aug 2021

Module/Topic	Chapter	Events and Submissions/Topic
Neural Networks: Adaptation and Implementation	Chapter 5 and 6 (Prescribed Textbook)	

Week 7 - 30 Aug 2021

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Fuzzy Sets and Fuzzy Logic	Chapter 7 (Prescribed Textbook)	

Week 8 - 06 Sep 2021

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Approximate Reasoning	Chapter 7 (Prescribed Textbook)	Written Assessment Due: Week 8 Friday (10 Sept 2021) 11:00 pm AEST

Week 9 - 13 Sep 2021

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Decision Making	Chapter 15 <i>Fuzzy sets and fuzzy logic</i> (Vol. 4) Klir, G. and Yuan, B., 1995.	

Week 10 - 20 Sep 2021

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Fuzzy Controller	Chapter 7 (Prescribed Textbook)	

Week 11 - 27 Sep 2021

Module/Topic	Chapter	Events and Submissions/Topic
Fuzzy Systems: Implementations	Chapter 8 (Prescribed Textbook)	

Week 12 - 04 Oct 2021

Module/Topic	Chapter	Events and Submissions/Topic
Performance Metrics	Chapter 10 (Prescribed Textbook)	Written Assessment Due: Week 12 Friday (8 Oct 2021) 11:00 pm AEST

Review/Exam Week - 11 Oct 2021

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 18 Oct 2021

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Email: m.hossain@cqu.edu.au (Best contact)
Telephone: +617 4923 2068

Assessment Tasks

1 Written Assessment

Assessment Type

Written Assessment

Task Description

In this assignment you will demonstrate your ability to apply evolutionary computing concepts to a hypothetical problem, and develop a software application. This assessment task is to design, code, debug, and test using the topics covered in Weeks 1-3. Further details are in the Assignment 1 Specification document available from the Unit website.

Assessment Due Date

Week 5 Friday (13 Aug 2021) 11:00 pm AEST

Submit via the Moodle Link

Return Date to Students

Week 7 Friday (3 Sept 2021)

Within 2 weeks of the due date or within 2 weeks of submission (whichever is the later)

Weighting

30%

Assessment Criteria

1. Appropriate application of evolutionary computation concepts to the given problem
2. Correct modelling of problem solution following evolutionary computation concepts
3. Effective Source code development applying correct algorithmic steps
4. Effective use of good programming practice/techniques
5. Rigorous testing to evaluate the correctness of the model and algorithm
6. Demonstration of potential practical applications in a written report

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit only one zip file (.zip) containing the source code files (.java) and document file (.doc or .docx).

Learning Outcomes Assessed

- Model internal representation, performance criteria, and computational components identifying elements of authentic problems to apply neural, fuzzy or evolutionary computation
- Create effective and efficient computational intelligence solutions to authentic problems

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

2 Written Assessment

Assessment Type

Written Assessment

Task Description

In this assignment you will demonstrate your ability to model a neural network to solve a hypothetical problem, and develop a software application implementing your model. This assessment task is to design, code, debug, and test using the topics covered in Weeks 4-7. Further details are available in the Assignment 2 Specification document available from the Unit website.

Assessment Due Date

Week 8 Friday (10 Sept 2021) 11:00 pm AEST

Submit via the Moodle Link

Return Date to Students

Week 10 Friday (24 Sept 2021)

Within 2 weeks of the due date or within 2 weeks of submission (whichever is the later)

Weighting

25%

Assessment Criteria

1. Correct modelling of problem solution following artificial neural network concepts
2. Effective Source code development applying correct algorithmic steps
3. Effective use of good programming practice/techniques
4. Rigorous testing to evaluate the correctness of the model and algorithm
5. Demonstration of potential practical applications in a written report

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit a zip file (.zip) containing the source code files (.java) and the report document file (.doc or .docx).

Learning Outcomes Assessed

- Create effective and efficient computational intelligence solutions to authentic problems
- Evaluate the solution to a computational intelligence problem, analysing the merits and demerits of the chosen approach
- Investigate the potential to enhance the model using one or more computational intelligence techniques.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

3 Written Assessment

Assessment Type

Written Assessment

Task Description

In this assignment you will demonstrate your problem solving and programming skills to apply fuzzy system concepts to a hypothetical problem, and develop a software application. This assessment task is to design, code, debug, and test using the topics covered in Weeks 7-11. Further details are in the Assignment 3 Specification document available from the Unit website.

Assessment Due Date

Week 12 Friday (8 Oct 2021) 11:00 pm AEST

Submit via the Moodle Link

Return Date to Students

Exam Week Friday (22 Oct 2021)

Within 2 weeks of the due date or within 2 weeks of submission (whichever is the later)

Weighting

45%

Assessment Criteria

1. Correct modelling of problem solution following fuzzy system concepts
2. Effective Source code development for correct implementation of the model
3. Effective use of good programming practice/techniques
4. Rigorous testing to evaluate the correctness of the model and algorithm
5. Suggestions to enhance the model combining one more computational intelligence technique to improve speed/accuracy
6. Write a report on applicability of the enhanced model in real world applications that will also promote social innovation

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit a zip file (.zip) containing the source code files (.java) and the report document file (.doc or .docx).

Learning Outcomes Assessed

- Model internal representation, performance criteria, and computational components identifying elements of authentic problems to apply neural, fuzzy or evolutionary computation
- Evaluate the solution to a computational intelligence problem, analysing the merits and demerits of the chosen approach
- Investigate the potential to enhance the model using one or more computational intelligence techniques.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Research
- Self-management

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
