General Information

Overview

Communications technologies have changed the way we live in profound ways and have determined the shape of contemporary culture around the world. At the same time, people play a role in cultural change by determining how such technologies are utilised. This unit examines the evolution of human communication, from non-verbal and visual forms to computer mediated interactions and AI collaborations. It will take you on an historical journey, exploring the innovative and creative discoveries and inventions of early civilisations and latter-day pioneers who shared a common desire to enhance and advance human interaction. The technological developments of the past are still very much connected to the way we live today, and how we will live in the future. Through this unit, you will develop a critical awareness of how new communication technologies are influenced by the same inherent needs of our ancestors; to communicate more effectively, more efficiently and on a global scale.
