General Information

Overview

Criminology graduates are required to have strong problem solving skills, support their solutions with evidence-based research and perform analysis of intelligence data. In this unit you will examine qualitative and quantitative research methods in order to develop the best strategy to respond to any given interdisciplinary criminology problem. You will also develop professional practice skills in writing reports for a public sector audience, in project management and in working with others in a criminal justice environment. This unit also examines the requirements of ethical research. The assignments in this unit require you to work with other researchers and to reflect on the process but do not require collaboration on the final submitted artefact.
