The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Issues in the justice field require a great deal of sensitivity to individual perspectives and understandings of the criminal justice system. Frequently situations involve violence and physical or mental harm. Qualitative research methods provide the investigator with insights into the contextual factors that influence offenders, victims and justice professionals. There are also legal/institutional limitations on research. In this unit you will develop your qualitative research skills, building on skills developed in this course with a focus on writing surveys, conducting interviews or using ethnographic techniques oriented to criminal research. You will examine the ethical context of qualitative research including the importance of respecting individuals or communities being researched and preservation of due process where required. You will also demonstrate the importance of ethical practice and effective data management practices using appropriate and secure technologies where breaches of privacy can also expose respondents and researchers to personal danger.

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.
