General Information

Overview

Systems of social control can possess a different character depending on whether you are a proponent of regulation or the subject of it. In this unit you will explore the ideas of conformity and delinquency through the lens of regulatory and systems theories in order to understand the impact of the criminal justice system on non-conforming members of society. Regulatory standards change over time and you will consider the history of moral and social regulation and achieve an appreciation of the influence of changing social mores on the criminal justice system, on outsiders and on marginalised communities. These mechanisms of control, both formal and informal, involve an intersection of criminal justice with other disciplines and agencies such as mental health or public planning. In contrast you will also examine the role of other regulatory systems, such as human rights and civil liberties, in protecting individuals from authoritarian control. During this unit you will debate a gamut of different issues including regulation of sexuality, drug use (illicit and legal drugs), control of youth cultures, hate crime, causing offense and supporting terrorism.
