General Information

Overview

This unit will teach you how to develop application software (apps) for mobile devices, building on your knowledge of programming, user experience design and web technologies. You will learn about key features of the mobile industry, mobile technologies, mobile devices and mobile platforms. Through a combination of theory and practice, you will learn how to develop and optimise content for mobile devices, and how to create user interfaces and navigation controls. You will design, implement, test and debug mobile applications using industry-standard software tools and cross-platform application programming interfaces (APIs).
