Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student evaluations

Feedback

Video tutorials are difficult to follow both in terms of structure and due to streaming compression.

Recommendation

The Moodle site and resources should be restructured to ensure that students access the PDF tutorial materials in the first instance rather than the video tutorials, which are intended as additional support, not the primary resource for tutorial instructions. To make this clear, individual links to specific video content should be embedded in the PDF tutorials as a supplementary resource to illustrate specific challenging technical techniques.
