General Information

Overview

The emergency and disaster management sector has highlighted the importance of contemporary practice being grounded in research. In this unit, you will be encouraged to explore the notion of research, plus the important questions of why and how research can and should inform the different phases of emergency and disaster management. In order to do so, you will build knowledge and skills in critically analysing research, understandings of the frameworks and practices guiding the ethical conduct of research and your role in utilising and implementing research in a professionally and ethically responsible manner. You will learn fundamental underpinning research literacies and how you can use these to inform decision-making processes grounded in evidence-based practice.
