General Information

Overview

According to the United Nations (UNISDR), there is no such thing as a 'natural' disaster, only natural hazards. Disaster Risk Reduction (DRR) is a contemporary approach that aims to reduce the damage caused by natural hazards in disaster situations. DRR applies an ethic of prevention and combines the principles of disaster management, disaster preparedness, disaster mitigation and sustainable development. In this unit, you will learn how to reduce disaster risk through sustainable planning, building community partnerships, reducing vulnerability and increasing resilience, with a particular emphasis on risks that impact upon public health.

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.
