General Information

Overview

Using real-life examples, you will examine the notion of community, voluntary participation by community members in emergency and disaster management contexts and situations and how these align with the broader volunteerism literature. You will evaluate the different models and theoretical constructs related to volunteerism and how these have changed over time. From this foundation, you will look at how the broader principles of volunteerism are applied in emergency and disaster management and look at ways in which volunteerism can be enhanced, both in the short and longer-term. By working with authentic examples, you will explore and apply your learning within your specific context or area of interest.
