

ECHO28007 Cardiac Anatomy and Pathophysiology

Term 1 - 2020

Profile information current as at 06/05/2024 05:43 am

All details in this unit profile for ECHO28007 have been officially approved by CQU University and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

Corrections

Unit Profile Correction added on 30-03-20

The end of term examination has now been changed to an alternate form of assessment. Please see your Moodle site for details of the assessment.

The Residential School and practical assessment for this unit have been replaced with an alternative delivery strategy. Please see your Moodle site for further details.

General Information

Overview

Accurate assessment of cardiac function requires you to assemble a comprehensive knowledge of the anatomy, physiology, and ultrasonic appearance of the heart, lungs and surrounding structures. By studying concepts of general pathology, cardiac structure and function, thoracic anatomy and physiology in this unit, you will gain the necessary knowledge to underpin your studies in the Graduate Diploma of Cardiac Ultrasound. This unit will build on introductory knowledge, through the discussion of signs and symptoms of cardiac disease, cardiac auscultation, and the application and interpretation of other diagnostic procedures such as an electrocardiogram (ECG). Through attendance at an intensive on-campus scanning workshop, you will be provided with theoretical knowledge and practical skills regarding echocardiographic image acquisition and scanning techniques for the adult heart, including the application of M-mode, spectral and colour Doppler.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite: Enrolment in CL74 Graduate Diploma of Cardiac Ultrasound

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2020

- Mixed Mode

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Online Quiz(zes)**

Weighting: 40%

2. **Practical Assessment**

Weighting: Pass/Fail

3. **Examination**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe the anatomy, physiology and spatial relationship of the cardiovascular and respiratory systems
2. Discuss concepts of general pathology, signs and symptoms of cardiac disease, including the application of cardiac auscultation
3. Identify anatomical structures on medical images of the cardiovascular system
4. Perform echocardiographic window acquisition demonstrating appropriate scanning techniques
5. Apply professional behaviour, teamwork and communication skills consistent with safe and ethical practice
6. Identify basic cardiac rhythm anomalies using electrocardiographic data.

Linked to the Australian Sonographers Accreditation Registry (ASAR) Accreditation Standards for Cardiac Sonography:

Foundation Units of Competence

- Unit 1: Deliver safe, patient centred service
- Unit 2: Practice within professional and ethical frameworks
- Unit 3: Locate, analyse and synthesise information to support evidence based practice
- Unit 4: Contribute to workplace health and safety and quality assurance
- Unit 5: Communicate effectively

Critical Practice Unit of Competence

- Unit 8: Cardiac

Schedule

Week 1 - 09 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Anderson B. A Sonographer's Guide to the Assessment of Heart Disease. 1st ed. Brisbane: Echotext; 2016. Chapter 2, p 19-24.

Anatomical terminology, body planes, gross cardiac and respiratory anatomy

Anderson B. Echocardiography : The Normal Examination and Echocardiographic Measurements. 3rd ed. Brisbane: Echotext; 2017. Chapter 2, p 33-34.

Lilly, L. Pathophysiology of heart disease. (6th ed.). Philadelphia: Wolters Kluwer; 2016. Chapter 1, p 1-7; Chapter 3, p 45-46.

Week 2 - 16 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Cardiac valvular anatomy and innervation	Anderson B. A Sonographer's Guide to the Assessment of Heart Disease. 1st ed. Brisbane: Echotext; 2016. Chapter 7, p 177-179; Chapter 8, p 215-217; Chapter 9, p 255 & 275-276.	
	Anderson B. Echocardiography : The Normal Examination and Echocardiographic Measurements. 3rd ed. Brisbane: Echotext; 2017. Chapter 4, p 75-78.	
	Lilly, L. Pathophysiology of heart disease. (6th ed.). Philadelphia: Wolters Kluwer; 2016. Chapter 1, p 2 & 8-10.	

Week 3 - 23 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Anatomy of the circulatory systems and regulation of coronary flow	Anderson B. A Sonographer's Guide to the Assessment of Heart Disease. 1st ed. Brisbane: Echotext; 2016. Chapter 5, p 113-114.	
	Kumar, V. Robbins Basic Pathology. 10th ed. Philadelphia: Elsevier; 2018. Chapter 10, p 361-363.	
	Lilly, L. Pathophysiology of heart disease. 6th ed. Philadelphia: Wolters Kluwer; 2016. Chapter 1, p 8-11.	

Week 4 - 30 Mar 2020

Module/Topic	Chapter	Events and Submissions/Topic
Echocardiography, display optimisation and anatomical variants	Anderson B. A Sonographer's Guide to the Assessment of Heart Disease. 1st ed. Brisbane: Echotext; 2016. Chapter 13, p 395-399.	
	Anderson B. Echocardiography : The normal examination and echocardiographic measurements. 3rd ed. Brisbane: Echotext; 2017. Chapter 2, p 34-70.	

Week 5 - 06 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Residential school

Anderson B. Echocardiography : The normal examination and echocardiographic measurements. 3rd ed. Brisbane: Echotext; 2017. Chapter 2, p 34-70.

Compulsory Residential School

Tuesday the 7th and Wednesday the 8th of April.

The **Practical Assessment** will be conducted during the residential school on Tuesday the 7th and Wednesday the 8th of April.

Practical Assessment Re-sits will be scheduled during the afternoon of day 2 of the residential school (Wednesday the 8th of April).

Break week - 13 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 20 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Cardiac conduction system, ECG recording and obvious anomalies

Garcia, T. Introduction to 12-Lead ECG: The Art of Interpretation. 2nd ed. United States of America: Jones & Bartlett Learning; 2015. Chapter 1, p 8-14; Chapter 6, p 49-53.

Lilly, L. Pathophysiology of heart disease. 6th ed. Philadelphia: Wolters Kluwer; 2016. Chapter 1, p 8 & 21-24; Chapter 4, p 74-111.

Online Quiz 1 will open at 8:00 am (AEST) on Thursday 23rd April (Week 6) and will close at 8:00 pm (AEST) Friday 24th April.

This quiz will assess the topics covered during weeks 1 to 4.

Week 7 - 27 Apr 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Phases of the cardiac cycle, intracardiac pressures and waveforms seen at catheterisation

Anderson B. Echocardiography : The normal examination and echocardiographic measurements. 3rd ed. Brisbane: Echotext; 2017. Chapter 15, p 295.

Lilly, L. (2016). Pathophysiology of heart disease (6th ed.). Philadelphia: Wolters Kluwer; 2016. Chapter 2; p 26-29; Chapter 3, p 55-59; Chapter 9, p 225-228.

Week 8 - 04 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Frank Starling Law, CO and auscultation

Lilly, L. Pathophysiology of heart disease. 6th ed. Philadelphia: Wolters Kluwer; 2016. Chapter 2, p 29-42; Chapter 9, p 221-224.

Online Quiz 2 will open at 8:00 am (AEST) on Thursday 7th May (Week 8) and will close at 8:00 pm (AEST) Friday 8th May.

This quiz will assess the topics covered during Weeks 5 to 7.

Week 9 - 11 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Cell injury, adaptation and death, inflammatory processes

Kumar V, Abbas A, Aster J, Perkins J, Robbins S. Robbins Basic Pathology. 10th ed. Philadelphia: Elsevier; 2018. Chapter 2, p 32-50; Chapter 3, p 59-94.

Week 10 - 18 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Atherosclerosis, hemostasis, hemodynamic disorders and their consequences

Kumar, V. Robbins Basic Pathology. 10th ed. Philadelphia: Elsevier; 2018. Chapter 4, p 97-114; Chapter 10, p 369-377.

Lilly, L. Pathophysiology of heart disease. 6th ed. Philadelphia: Woltzers Kluwer; 2016. Chapter 5, p 126-132.

Week 11 - 25 May 2020

Module/Topic	Chapter	Events and Submissions/Topic
Signs and symptoms of cardiac disease, shock and disorders of immunity	Kumar, V. Robbins Basic Pathology. 10th ed. Philadelphia: Elsevier; 2018. Chapter 4, p 115-119.	

Week 12 - 01 Jun 2020

Module/Topic	Chapter	Events and Submissions/Topic
Revision and examination preparation		

Exam Block - 08 Jun 2020

Module/Topic	Chapter	Events and Submissions/Topic
		Individual examination schedules can be accessed via your personal MyCentre student account.

Exam Block - 15 Jun 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Unit Coordinator and Contact details

Your coordinator for ECHO28007 Cardiac Anatomy and Pathophysiology is Paula Boucaut. The most efficient and preferred method of contacting Paula is via the Q&A forum located on the unit Moodle site. Nevertheless, if your query is of a personal nature, please contact Paula directly via email (p.boucaut@cqu.edu.au) or phone (0730234108).

Unit Tutorials

Tutorials for this unit will be delivered 'live' online using ZOOM (the links required for accessing the tutorials are provided on the Moodle site). The sessions will also be recorded and made available on Moodle. The tutorials are structured and will focus on answering the weekly study questions (these can be found on Moodle under each weekly tab), and contextualisation of key concepts in preparation for related assessments.

Unit Study Commitment

As per Australian educational standards, you are expected to commit a total of 150 hours (i.e. 12.5 hours per week) of engagement toward your study for this unit. A suggestion for how you should allocate your study commitment per week is as follows:

- 3 hours watching recorded lectures
- 2 hours completing recommended readings
- 1.5 hours creating study notes
- 1 hour completing the weekly study questions
- 1 hour participating in/or viewing the weekly tutorial
- 4 hours preparing for quizzes, practical assessments or the final examination

All students are required to attend an on-campus **Compulsory Residential School** on Tuesday the 7th and Wednesday the 8th of April. Students will be notified of the campus venue details and residential school schedule upon term commencement.

Please ensure that you review the 'Welcome video' available on the Moodle site for further unit specific information.

Assessment Tasks

1 Online Quiz (zes)

Assessment Type

Online Quiz(zes)

Task Description

Each quiz will assess your understanding of the content presented within this unit as outlined below. Questions may be drawn from lectures, additional resources provided (e.g. prescribed readings) or tutorial presentations.

Each quiz can be accessed through the assessment tab on Moodle at the assigned time.

- Each quiz will be marked out of 30 marks.
- Questions may include multiple choice, short answer, or image interpretation format.
- Each quiz will be open for 40 minutes.

Once started, each quiz cannot be paused or restarted. Only one attempt per quiz is permitted.

As each quiz is online and open book, you will find it useful if you have produced your own notes from the lectures and that you are familiar with the unit information. Questions will be drawn from a resource bank, to allow tests to be different for each student. You may benefit from having a calculator available when sitting the quiz.

This assessment is to be undertaken as an individual. As with all other university examination, colluding with other students on non-group work tasks is considered academic misconduct, and may lead to action being taken the Deputy Dean of Learning and Teaching HMAS.

Number of Quizzes

2

Frequency of Quizzes

Assessment Due Date

Quiz 1 will open at 8:00 am (AEST) on Thursday 23rd April (Week 6) and will close at 8:00 pm (AEST) Friday 24th April. This quiz will assess the topics covered during weeks 1 to 4. Quiz 2 will open at 8:00 am (AEST) on Thursday 7th May (Week 8) and will close at 8:00 pm (AEST) Friday 8th May. This quiz will assess the topics covered during Weeks 5 to 7.

Return Date to Students

Individual student results and feedback will be made available once submissions have been marked and moderated. The online quiz question pool in its entirety will not be released to students.

Weighting

40%

Minimum mark or grade

To PASS this assessment task, a minimum of 50% must be achieved for the combined 'overall' mark from quiz 1 and 2 (i.e. 30/60 marks overall).

Assessment Criteria

You will be required to answer a variety of online questions.

Question responses will be assessed according to the:

- use of appropriate terminology and descriptors as well as grammar and spelling
- student's ability to appropriately interpret presented sonographic images and cardiac assessment data
- student's ability to succinctly respond with accurate answers

Your score from each individual quiz will contribute 20% to your final grade. Thus, your combined score from the quizzes will contribute to 40% of your final unit grade (2 quizzes x 20% = 40%).

The specific dates that each quiz opens and closes are outlined above. Please note that the quizzes must be completed before the due date listed. In the absence of an approved extension, there will be no opportunity to complete the task after this date, and there will be no opportunity to apply a late penalty of five percent per day.

Please note:

It is your responsibility to ensure that you commence each online quiz before Friday 7:20 pm (AEST).

- Each quiz will automatically close at 8:00 pm (AEST)
- If you have not completed the test by this time, your test may be submitted incomplete or with no answers
- You will have 40 minutes to attempt each quiz
- Students are reminded that IT support from the university Information and Technology Division (TASAC) is only available during AEST business hours

In the absence of an approved extension, this assessment cannot be completed at a later time. Students will receive a mark of zero (or fail) for this assessment, if you have not completed it by the scheduled date and time and do not have an extension. Students are advised to refer to the 'Assessment Policy and Procedure (Higher Education Coursework) document for additional university guidelines regarding assessments.

Referencing Style

Submission

Online

Submission Instructions

Each quiz is accessed via the assessment tab in Moodle.

Learning Outcomes Assessed

- Describe the anatomy, physiology and spatial relationship of the cardiovascular and respiratory systems
- Discuss concepts of general pathology, signs and symptoms of cardiac disease, including the application of cardiac auscultation
- Identify anatomical structures on medical images of the cardiovascular system
- Identify basic cardiac rhythm anomalies using electrocardiographic data.

Graduate Attributes

- Knowledge
- Communication

2 Practical Assessment

Assessment Type

Practical Assessment

Task Description

The residential school will provide students with an opportunity to explore ultrasound transducer manipulation and standard image acquisition under the guidance of a tutor. Students will also explore the application of professional skills and behaviour as appropriate to that required of an Echocardiographer.

The practical assessment will be conducted during the Residential School in Week 5. You will use knowledge from previous weeks as well as skills learned at the Residential School to perform each task under the supervision of a Tutor.

This practical assessment has 2 components:

1. Demonstration of safe practice including hand hygiene and scanning ergonomics.
2. Acquisition of standard imaging windows with correct:
 - probe manipulation
 - image plane identification
 - identification of key anatomical landmarks

Each assessment component is PASS/FAIL. ALL assessment components must be successfully completed to pass this practical assessment and the unit overall.

Following provision of assessment feedback, only one opportunity for re-sit of any failed component will be provided.

Re-sits will be scheduled during the afternoon of day 2 of the residential school (Wednesday the 8th of April).

Assessment Due Date

Assessments will be conducted during the residential school on Tuesday the 7th and Wednesday the 8th of April.

Return Date to Students

Direct feedback will be provided at the time of practical assessment.

Weighting

Pass/Fail

Assessment Criteria

Component 1

Students will be assessed on their ability to demonstrate professional behaviour and safe practice.
The student will be assessed on their ability to:

- perform appropriate hand hygiene
- apply knowledge of infection control practices at the patient bedside
- implement ergonomic adjustments

A detailed marking rubric can be found on the Moodle site.

Component 2

Students will be assessed on their ability to follow tutor instruction, demonstrating basic knowledge of ultrasound scanning and window acquisition.

The student will be assessed on their ability to:

- obtain on-axis orthogonal views
- identify sector orientation
- manipulate the transducer
- use appropriate terminology

A detailed marking rubric can be found on the Moodle site.

In the absence of an approved extension, this assessment cannot be completed at a later time.

Students will receive a mark of zero (or fail) for this assessment, if you have not completed it by the scheduled date and time and do not have an extension.

Students are advised to refer to the 'Assessment Policy and Procedure (Higher Education Coursework) document for additional university guidelines regarding assessments.

Referencing Style

- [Vancouver](#)

Submission

No submission method provided.

Submission Instructions

Marking rubrics will be completed at the time of assessment by the practical supervisor. Rubrics will be loaded into Moodle for student review following moderation.

Learning Outcomes Assessed

- Perform echocardiographic window acquisition demonstrating appropriate scanning techniques
- Apply professional behaviour, teamwork and communication skills consistent with safe and ethical practice

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management
- Ethical and Professional Responsibility
- Leadership

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

60%

Length

180 minutes

Minimum mark or grade

50%

Exam Conditions

Closed Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Calculator - non-programmable, no text retrieval, silent only

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
