General Information

Overview

This unit introduces basic principles of microeconomic and macroeconomic theory and the methods of economic analysis. You will examine the demand-supply model, market equilibrium, elasticity, and how the prices of goods and services, and the cost and revenue curves are determined. You will compare the key market structures: perfect competition, monopoly, monopolistic competition, and oligopoly and examine why government intervention is necessary in order to correct market failure and achieve allocative and productive efficiency. You will be introduced to the key macroeconomic indicators and their role in managing the economy. You will be given the opportunity to explore the dynamics of macroeconomic policies, and their effectiveness in achieving national economic objectives and dynamic efficiency to achieve long term economic growth.
