General Information

Overview

This unit introduces you to socio-cultural theory as a basis for understanding language acquisition and use and for evaluating pedagogical approaches to literacy learning. You will examine “multiliteracies” through the twin dimensions of multimodality and multiple perspectives. An understanding of discourses and the relationship between texts and contexts in developing authentic learning and literacy experiences for first and second language learners at all stages of the school curriculum and prior to formal schooling is explored in depth. You will build an understanding of oracy as a language resource for a growing number of purposes in an increasing range of situations and value children as communicators with a repertoire of practices for making and constructing meaning including the use of Arts symbol systems and ICTs. You will analyse and plan for the use of teaching and learning practices that promote effective interaction with learners and enhance language use, oracy and creativity through engagement with literature and aesthetic meaning making processes in the early years and formal learning contexts.
