General Information

Overview

Sustainability through Active Citizenship focuses on strategies and processes that educators can use to achieve the stated goal of the Melbourne Declaration of supporting young Australians to develop as active, informed citizens. Students explore issues related to Citizenship Education within the context of multicultural society and the lived experience of Aboriginal and Torres Strait Islander people and identify pedagogical practices for modelling democratic process in classroom settings. They develop understanding of sustainability as an issue involving values education and apply democratic and participatory processes to enact a group decision-making and planning task related to action for sustainable futures. Individually, students reflect on the relevance of the strategies and processes for use in primary school classrooms in terms of their potential for educating learners to achieve the goal of active, informed citizenship and to value participation in communities and groups for creating sustainable futures.
