

Profile information current as at 04/05/2024 01:48 am

All details in this unit profile for EDCU13020 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In Mathematics Curriculum, students build on the knowledge acquired in previous Mathematics units to develop deep understanding of the structure, sequencing and links between critical concepts and skills in content across the year levels in the Australian Curriculum: Mathematics. They apply this knowledge to identify issues or challenges to mathematical understanding and problem-solving in key stages of the learning sequence as a guide for developing diagnostic assessment tools. Students develop resources to prevent or overcome difficulties in the development of Mathematical knowledge and skills and design and justify approaches to using physical and digital resources to teach specific sub-strands of the curriculum to overcome barriers to learning and improve the transfer of mathematical reasoning, logic and analysis to problem-solving situations. Personal numeracy competence is enhanced in this unit as students develop suggested marking guides for diagnostic assessment using appropriate and accurate mathematical procedures and communication.

Details

Career Level: Undergraduate Unit Level: Level 3 Credit Points: 6 Student Contribution Band: 7 Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisite:- Students must successfully complete the unit EDCU12038 prior to enrolling in this unit. Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the <u>Assessment Policy and</u> <u>Procedure (Higher Education Coursework)</u>.

Offerings For Term 2 - 2020

- Bundaberg
- Cairns
- Mackay
- Noosa
- Online
- Rockhampton
- Townsville

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Regional Campuses

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

Metropolitan Campuses Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Practical and Written Assessment** Weighting: 50%

2. Presentation and Written Assessment Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the <u>University's Grades and Results Policy</u> for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the CQUniversity Policy site.

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the <u>CQUniversity Policy site</u>.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback

Feedback

Moodle organisation and navigation supported learning, and the content scaffolded knowledge and skills required for the assessment tasks.

Recommendation

Retain unit learning materials to scaffold understanding.

Feedback from Unit coordinator's reflection

Feedback

Assessment tasks are authentic and support practical application in classroom settings.

Recommendation

Retain the assessment tasks and emphasise practical application in the individual component of Assessment Task 2.

Feedback from Student feedback

Feedback

Students value assessment feedback to support their learning.

Recommendation

Provide markers with examples and resources to support the provision of task-specific feedback on assessments.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

- 1. Analyse the structure and organisation of content in the Mathematics curriculum to identify key stages in concept development as a focus for learning and diagnostic assessment
- Appraise Mathematics content to identify possible misconceptions or barriers to learning for diverse student groups
- Distinguish evidence-based approaches to teaching Mathematics that promote engagement, understanding and mathematical proficiency for students from diverse backgrounds including Aboriginal and Torres Strait Islander students
- 4. Design diagnostic tools and reliable guides for assessing students' knowledge and skills in Mathematics
- 5. Reflect on professional learning to describe processes and strategies that improve teaching practice and student learning
- 6. Justify the selection and use of resources that scaffold students' understanding of core mathematical concepts
- 7. Identify opportunities for students to use ICTs purposefully to gain mathematical knowledge and proficiency.

Successful completion of this unit provides opportunities for students to engage with the Australian Professional Standards for Teachers (Graduate Career Stage) focus areas of:

- 1.1 Physical, social and intellectual development and characteristics of students
- 1.2 Understand how students learn
- 1.3 Students with diverse linguistic, cultural, religious and socioeconomic backgrounds
- 1.4 Strategies for teaching Aboriginal and Torres Strait Islander students
- 2.1 Content and teaching strategies of the teaching area
- 2.5 Literacy and numeracy strategies
- 2.6 Information and Communication Technology (ICT)
- 3.4 Select and use resources
- 5.1 Assess student learning
- 6.2 Engage in professional learning and improve practice
- 6.4 Apply professional learning and improve student learning

Assessment Tasks

1 Assessment 'for' Learning: Creating Diagnostic Tools

Assessment Type

Practical and Written Assessment

Task Description

This task requires you to examine the relationship between curriculum, pedagogy and assessment and apply your knowledge and understanding to develop and enhance assessment practices and teaching in mathematics. This assessment comprises of the following activities:

Conduct a thorough analysis of a mathematical concept represented within the *Australian Curriculum: Mathematics* and record the analysis in a <u>graphic organiser</u>.

Research common misconceptions associated with the specific mathematical concept.

Create <u>diagnostic assessment tools</u> that capture evidence of students' readiness for learning the concept, determine misconceptions that students may have developed and support the teacher to identify the cause of the faulty thinking.

Produce a <u>written response</u>, of 1000 words, that addresses the barriers to learning the concept and proposes appropriate pedagogical responses that support mathematical proficiency. You will need to consider learners with differing levels of prior knowledge from diverse backgrounds, including individuals from various linguistic, cultural, religious, educational and socioeconomic backgrounds, and students who identify as Aboriginal and/or Torres Strait Islander.

Consider how the context of this assessment task contributed to your professional learning and record these conclusions in a personal, <u>written reflection</u> of 500 words.

Detailed instructions and a suggested format for completing this assessment task are available in the Assessment Task 1 section in Moodle.

Assessment Due Date

Week 6 Thursday (27 Aug 2020) 11:45 pm AEST

Return Date to Students

Week 9 Friday (18 Sept 2020)

Weighting 50%

Assessment Criteria

Knowledge and understanding of the concepts, substance and structure of the content in the Mathematics curriculum (APST 2.1)

Ability to create and modify appropriate assessment tools that determine students' prior knowledge and achievement and understanding of mathematical concepts (APST 5.1)

Knowledge and understanding of barriers to mathematical proficiency and appropriate pedagogical responses to differentiate for diverse learning needs (APST 1.1, 1.2, 1.3, 1.4, 2.5)

Demonstrated understanding of the relationship between professional learning for teachers and improved student outcomes (APST 6.2, 6.4)

Application of academic writing conventions and adherence to APA style and referencing

Successful completion of Assessment Task 1 in Mathematics Curriculum provides opportunities for students to demonstrate the Australian Professional Standards for Teachers focus areas of 1.1, 1.2, 1.3, 1.4, 2.1, 2.5, 5.1, 6.2 and 6.4.

Referencing Style

• American Psychological Association 7th Edition (APA 7th edition)

Learning Outcomes Assessed

- Analyse the structure and organisation of content in the Mathematics curriculum to identify key stages in concept development as a focus for learning and diagnostic assessment
- Appraise Mathematics content to identify possible misconceptions or barriers to learning for diverse student groups
- Distinguish evidence-based approaches to teaching Mathematics that promote engagement, understanding and mathematical proficiency for students from diverse backgrounds including Aboriginal and Torres Strait Islander students
- Design diagnostic tools and reliable guides for assessing students' knowledge and skills in Mathematics
- Reflect on professional learning to describe processes and strategies that improve teaching practice and student learning

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Cross Cultural Competence

2 Resources for Learning: Expanding Professional Knowledge

Assessment Type

Presentation and Written Assessment

Task Description

This task requires you to investigate resources and ICTs that address barriers and misconceptions relating to a mathematical concept, which can be located in a specific year level, Content Description or Achievement Standard within the *Australian Curriculum: Mathematics*. The results of your investigation will contribute to the expansion of professional knowledge, amongst fellow preservice and beginning teachers, through the establishment of a bank of resources for teaching Mathematics in primary classrooms. This assessment comprises of the following activities:

Consider common misconceptions or barriers that are associated with a mathematical concept and investigate how the faulty thinking can be corrected, or the barriers overcome, through features or characteristics of resources that scaffold students' understanding of the mathematical concept.

Select two resources (one ICT based) that address a misconception or barrier and *create* <u>a presentation</u> that introduces the resources to an audience of beginning teachers. The selection of the resources should consider the mathematical learning needs of learners from a range of diverse backgrounds and experiences.

Compile a <u>written justification</u>, of 1200 words, that explains the selection of resources for supporting interventions that address the barriers or misconceptions. The justification should address how the resources are inclusive of students with differing levels of understanding and experience, and describe how the resources promote engagement, understanding and mathematical proficiency.

Detailed completion and submission instructions for this assessment task are available in the Assessment Task 2 section in Moodle.

Assessment Due Date

Week 12 Thursday (8 Oct 2020) 11:45 pm AEST

Return Date to Students

Assessment tasks will be returned following moderation, in preparation for Certification of Grades.

Weighting

50%

Assessment Criteria

Knowledge and understanding of resources that address mathematical misconceptions or barriers to understanding for learners from diverse backgrounds and experiences (APST 1.1, 1.3)

Knowledge and selection of appropriate resources that engage students in learning mathematics and expand learning opportunities (APST 3.4)

Knowledge and selection of purposeful ICTs that support mathematical knowledge and proficiency (APST 2.6) Application of academic writing conventions and adherence to APA style and referencing

Successful completion of Assessment Task 2 in Mathematics Curriculum provides opportunities for students to demonstrate the Australian Professional Standards for Teachers focus areas of 1.1, 1.3, 2.6 and 3.4.

Referencing Style

<u>American Psychological Association 7th Edition (APA 7th edition)</u>

- Information Technology Competence
- Ethical practice

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the <u>Academic Learning Centre (ALC)</u> can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Seek Help If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
