General Information

Overview

In this unit, students recognise leadership as a socio-cultural construct that is a professional capability expected of early childhood professionals and crucial for ensuring quality learning outcomes for children, the development of integrated services within communities, the ongoing growth of the profession and the thoughtful enactment of policy. Students examine the multiple ways in which leadership is theorised with a particular focus on self-leadership, pedagogical leadership, community leadership and intentional leadership. They examine leadership as encompassing moral and ethical behaviour, advocacy for children's rights and a commitment to principles of equity and social justice and show understandings of how policy contexts, including legislative frameworks, shape the work of early childhood education leaders. Theoretical tools, engaging with professional networks and the broader community, a disposition to embrace the principles of leadership and practical skills in leadership and management are applied as students deliver a community venture that advocates for young children and their families within the local community and contributes to building social capital.

Assessment Type

Practical and Written Assessment

Task Description

Task 2: Enacting a community venture.

Overview:

In your context as a distance or internal student you are required to practically demonstrate skills of leadership, advocacy and management in a community venture. This task is to be presented in an **essay format that includes headings** or in an **online format** such as **wix, wiki or similar**.

Internal and distance students will meet the task requirements outlined for the internal students. Some modifications have been put in place for distance students.

Task:

Internal students:

As a member of a **small group (3-4 students)**, you are required to lead a community venture that advocates for young children and their families.

Enacting this task requires application of leadership and management knowledge, skills and dispositions and application of professional ethics and responsibilities in a real-life context.

Your group must document and reflect on all aspects of planning and enacting the community venture by explicating the process (team work, strategic planning, legislative requirements, etc), the dilemmas you encountered, how you attended to the dilemmas and your personal learning as a result of engaging in the process.

As part of this analysis you will identify and examine:

- the goals and visions for your small group
- legal and ethical considerations required for the venture
- time management strategies
- the strategic plan to ensure the venture advocates for early childhood
- how a group of people works together as a team
- the management of possible or existing conflict
- decision making strategies
- networking and links with other organisations and stakeholders needed for the success of the venture
- the understanding of the different levels of 'leadership' within the group

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own
