

EDEC28002 Pedagogy in Early Childhood Education and Care Settings

Term 3 - 2024

Profile information current as at 06/12/2024 04:54 pm

All details in this unit profile for EDEC28002 have been officially approved by CQU University and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

The pedagogical approaches adopted by teachers within early childhood settings are informed by a range of sources including understandings about how young children learn, emerging research on the importance of the first one thousand days in the life of a child and guidance from research and curriculum frameworks. Play is recognised as a context for learning with the child's right to play and the benefits of play enshrined in national and international policy. In this unit, you will research early childhood pedagogies and theories of play that support the holistic development of young children. Understandings derived by researching pedagogical approaches and learning theory will inform the selection of strategies that are responsive to children's development. The centrality of relationships and responsive language-rich adult-child interactions as pedagogy will be examined also. You will apply practices for gathering, organising, interpreting and sharing data about what children know, can do and understand. Through the analysis of curriculum documents, you will identify opportunities for children's acquisition of literacy and numeracy knowledge in meaningful and developmentally appropriate ways.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: 6

Student Contribution Band: 7

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Completion of 72 credit points in CA10 or CG72 OR Admission to CM43.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 3 - 2024

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 50%

2. **Presentation**

Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student communication

Feedback

Recommendation

Continue to embed contemporary research pertaining to early childhood pedagogies

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Analyse curriculum documents to identify opportunities for children's acquisition of literacy and numeracy knowledge in meaningful and developmentally appropriate ways
2. Research and apply strategies for gathering, organising, interpreting and sharing data about children's learning with particular attention given to sharing information with important stakeholders (families)
3. Research a range of early childhood teaching strategies/pedagogies and theories of play that support the intellectual, social, emotional and physical development and learning of young children
4. Analyse the learning behaviour of children to document their strengths, needs, interests and capabilities and identify opportunities for learning
5. Synthesise knowledge of child development, learning theory and contemporary research to recommend teaching strategies/pedagogies that are responsive to children's stages of development and characteristics that affect their learning
6. Justify pedagogical approaches and responsive adult-child interactions that support the learning of children from birth to eight years of age with reference to contemporary research literature
7. Identify strategies to support inclusive student participation and engagement in classroom activities.

Learning outcomes and assessment in this unit provide opportunities for students to engage with content and practices in the Australian Professional Standards for Teachers (Graduate Stage) focus areas of:

- 1.1 Physical, social and intellectual development and characteristics of students
- 1.2 Understand how students learn
- 1.3 Students with diverse linguistic, cultural, religious and socioeconomic backgrounds
- 1.4 Strategies for teaching Aboriginal and Torres Strait Islander students
- 1.5 Strategies to support full participation of students with disability
- 2.5 Literacy and numeracy strategies
- 3.3 Using teaching strategies
- 3.5 Use effective classroom communication
- 3.7 Engage parents/carers in the educative process
- 4.1 Support student participation
- 5.1 Assess student learning
- 5.4 Interpret student data
- 6.2 Engage in professional learning and improve practice
- 6.4 Apply professional learning and improve student learning

Term Specific Information

This unit will have a vacation after the official vacation week until the unit content recommences delivery in week 9 and study will continue till Week 12.

Assessment Tasks

1 Assessment Task 1: Pedagogical approaches for children

Assessment Type

Written Assessment

Task Description

Task Description

Drawing on scenarios provided on Moodle and engagement with relevant literature, you are required to identify approaches to pedagogy for children:

- Birth - 3 Years
- 3 years - 5 years

As you consider the pedagogical approaches for the two age ranges identified, you need to consider how the pedagogies support the holistic development of the child and align with what we know about the development and characteristics of young children. You need to make explicit how such approaches support inclusive student participation and engagement in classroom activities and contribute to the development of literacy and numeracy knowledge. Particular attention to how the pedagogical choices you make support children and are responsive to the learning strengths and needs of students from diverse linguistic, cultural, religious, and socioeconomic backgrounds (including children with Aboriginal and Torres Strait Islander backgrounds) is required. The centrality of responsive adult-child interactions that support the belonging and development of children needs to be discussed.

As part of your consideration, you need to identify the learning opportunities afforded to children in the scenarios and document how the learning opportunities for children reflect the theory you have examined and link to the learning outcomes of the early years learning framework and where appropriate the Kindergarten Guidelines (or similar in your State or Territory).

Your documentation may take the form of a learning story but there must be explicit attention to the learning that is occurring. There must be evidence of considering the learning that is occurring in the capabilities of literacy and numeracy. Additional annotation needs to be included to articulate why the teacher made particular pedagogical decisions. You need to reflect on the importance of documentation as a mechanism for engaging parents/carers in the educative process.

Use of Generative Artificial intelligence Agents (Gen AI)

Within this assessment, the use of Gen AI agents is as follows:

- No Gen AI use at any point during this assessment.

Assessment Due Date

Week 7 Friday (20 Dec 2024) 11:45 pm AEST

Return Date to Students

Week 10 Monday (20 Jan 2025)

Weighting

50%

Assessment Criteria

- Synthesis of contemporary research on early childhood pedagogies
- Articulation of knowledge of the links between early childhood pedagogies, learning theory, and knowledge of young children
- Discussion of how early childhood pedagogies support inclusive participation and learning ● Justification for the importance of responsive adult-child interactions and playfulness
- Application of strategies for data gathering, organisation, and analysis
- Documentation of children's learning with links to the relevant learning framework (EYLF)
- Reflection on the importance of documentation as a mechanism for engaging parents/carers in the educative process
- Effective, scholarly and professional communication in accordance with accepted academic conventions APA 7th

Referencing Style

- [American Psychological Association 7th Edition \(APA 7th edition\)](#)

Submission

Online

Learning Outcomes Assessed

- Analyse curriculum documents to identify opportunities for children’s acquisition of literacy and numeracy knowledge in meaningful and developmentally appropriate ways
- Research and apply strategies for gathering, organising, interpreting and sharing data about children’s learning with particular attention given to sharing information with important stakeholders (families)
- Research a range of early childhood teaching strategies/pedagogies and theories of play that support the intellectual, social, emotional and physical development and learning of young children
- Analyse the learning behaviour of children to document their strengths, needs, interests and capabilities and identify opportunities for learning
- Synthesise knowledge of child development, learning theory and contemporary research to recommend teaching strategies/pedagogies that are responsive to children’s stages of development and characteristics that affect their learning
- Justify pedagogical approaches and responsive adult-child interactions that support the learning of children from birth to eight years of age with reference to contemporary research literature
- Identify strategies to support inclusive student participation and engagement in classroom activities.

Graduate Attributes

2 Assessment Task 2 Professional learning presentation

Assessment Type

Presentation

Task Description

Task Description

Part A.

In the previous assessment task, the focus was on pedagogies that teachers enact in the years prior to school contexts. In this assessment task, you will build on your knowledge of early childhood pedagogy to consider appropriate pedagogies in the early years of school. You are required to research pedagogies appropriate in the early years of school that support the holistic development and learning of young children. You are required to provide a synthesis of this research as an appendix to this assessment task.

Part B:

Drawing on your developing knowledge of early childhood pedagogies, you are to develop two professional development sessions for F-2 teachers. You need to make explicit how the use of appropriate pedagogies and adult-child interactions in the Foundation to Year 2 years of schooling enables young children to engage in meaningful learning across the curriculum to enhance the general capabilities of literacy and numeracy.

These PD sessions will:

1. Provide theoretical knowledge (perhaps key readings) for the participants
2. Use vignettes (from websites such as AITSL, and Dept of Education) to show how pedagogies might look in an F-2 classroom where the pedagogies align with what we know about young children, their way of learning, the developing brain, and their development across the domains of development
3. Identify how the environment supports appropriate pedagogies for children in the F-2 classroom

Part C:

In this final section, you are asked to reflect on why teachers need to engage in continued professional learning during their teaching career and also show evidence of where to access professional learning as a member of the early childhood profession.

Use of Generative Artificial intelligence Agents (Gen AI)

Within this assessment, the use of Gen AI agents is as follows:

- No Gen AI use at any point during this assessment.

Assessment Due Date

Exam Week Monday (10 Feb 2025) 11:45 pm AEST

Return Date to Students

Exam Week Friday (14 Feb 2025)

Weighting

50%

Assessment Criteria

- Synthesis of contemporary research on pedagogies appropriate to the early years of schooling
- Design of professional development embeds contemporary research and shares theoretical knowledge
- Selection of examples of pedagogies that show evidence of knowledge of young children, their way of learning, and the developing brain
- Identification of how the design of the environment supports the implementation of appropriate pedagogies

- Reflection on the importance of professional learning and the identification of resources that might support professional learning
- Effective, scholarly and professional communication in accordance with accepted academic conventions APA 7th

Learning Outcomes Assessed

- Analyse curriculum documents to identify opportunities for children's acquisition of literacy and numeracy knowledge in meaningful and developmentally appropriate ways
- Research a range of early childhood teaching strategies/pedagogies and theories of play that support the intellectual, social, emotional and physical development and learning of young children
- Synthesise knowledge of child development, learning theory and contemporary research to recommend teaching strategies/pedagogies that are responsive to children's stages of development and characteristics that affect their learning
- Justify pedagogical approaches and responsive adult-child interactions that support the learning of children from birth to eight years of age with reference to contemporary research literature

Graduate Attributes

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
