General Information

Overview

Curriculum Foundations and Decision-making builds students' knowledge and understanding of the key learning theories of behaviourism, humanism, constructivism, social-constructivism and connectivism as a basis for exploring pedagogical approaches to curriculum construction and decision-making. Analysis and critique of the view of learners and approaches to teaching and learning articulated in the Early Years Learning Framework and Australian Curriculum documents are an important focus of this unit. Students reflect on how learners are positioned to make transitions to new learning contexts and evaluate strategies for designing authentic relevant curriculum and environments for diverse learner groups with a focus on inquiry, active investigation and problem-solving. Students collaborate in groups to apply these strategies across selected learning contexts including early years settings to either: (a) the design and presentation of child-centred open-ended learning experiences; or (b) the creation of a learning environment with possibilities for developing literate, numerate, scientific, technological or environmental understandings
