General Information

Overview

In this unit the focus is on students in the pre-adolescent and adolescent years. In this unit you will develop further understandings about the ways in which educators create supportive learning environments that are responsive to students needs. In particular, you will identify strategies to promote positive wellness and mental health for yourself and for your students. You will articulate a developed understanding of the links between risk and protective factors, wellness and learning, and use examples from your environment and community to develop analytical and practical knowledge of the notion of wellbeing and mental, emotional and social health as a community concern. Throughout this unit you will reflect upon the ways in which learning and wellbeing are linked and how a learner's individual, school and community experiences can impact on wellbeing. You will also consider your own wellbeing and explore enabling strategies that will support the efficacy of your own professional practice.
