

Profile information current as at 12/05/2024 10:09 am

All details in this unit profile for EDSE11022 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

## **General Information**

## Overview

This unit provides an introduction to product design and development using a major natural resource, timber. It includes graphical design processes and occupational health and safety considerations in the demonstration of practical and theoretical knowledge and skills that are necessary to teach Industrial Technology and Design in the middle years of schooling (7-10). Knowledge and understanding of timber as a renewable natural resource, and its use in production processes will be gained through working with industrial machinery, digital and hand tool technologies. Students will design, develop, adapt and evaluate projects utilising critical aspects of knowledge about timber, and develop hands-on skills of working with timber-based materials.

## **Details**

Career Level: Undergraduate

Unit Level: Level 1 Credit Points: 6

Student Contribution Band: 7

Fraction of Full-Time Student Load: 0.125

# Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the <u>Assessment Policy and Procedure (Higher Education Coursework)</u>.

# Offerings For Term 2 - 2019

• Mixed Mode

# Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

## Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are: Click here to see your Residential School Timetable.

#### Website

This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.

## Class and Assessment Overview

## Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

## Class Timetable

## **Regional Campuses**

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### **Metropolitan Campuses**

Adelaide, Brisbane, Melbourne, Perth, Sydney

## **Assessment Overview**

1. Online Quiz(zes)

Weighting: 20%

2. Written Assessment

Weighting: 30%

3. Practical Assessment

Weighting: 50%

## Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the <u>University's Grades and Results Policy</u> for more details of interim results and final grades.

# **CQUniversity Policies**

## All University policies are available on the CQUniversity Policy site.

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the CQUniversity Policy site.

## Previous Student Feedback

# Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

## Feedback from Student evaluation survey

#### **Feedback**

Increase number of Residential days

#### Recommendation

Possible increase in residential days.

# **Unit Learning Outcomes**

## On successful completion of this unit, you will be able to:

- 1. Demonstrate knowledge and understanding of timber industry practices
- 2. Apply theories of using timber as a renewable resource and the technological processes used to produce timber-based materials underpinning the content of middle years Industrial Technology and Design teaching
- 3. Investigate how to plan, sequence, implement and assess timber materials used in the production of projects incorporated in the middle years industrial technology and design teaching area
- 4. Recognise and apply basic skills sequences and procedures using design processes required for teaching timber technologies to school students in Years 7-10
- 5. Critically evaluate specific applications of tools and equipment used in the production of timber technologies in the Middle Years of Learning
- 6. Apply Occupational Health and Safety legislation in the school work place

N/A Introductory Intermediate Graduate Professional Advanced

- 7. Analyse preferred implementation processes for the design of timber technologies through sequenced processes
- 8. Demonstrate a professional capacity to communicate, work and learn, individually and in peer learning teams.

# Alignment of Learning Outcomes, Assessment and Graduate Attributes

| Level Level  | Level      | Level | Level |                   | Level |   |   |   |   |   |   |
|--|------------|-------|-------|-------------------|-------|---|---|---|---|---|---|
| Alignment of Assessment Tasks to Learning Outcomes |            |       |       |                   |       |   |   |   |   |   |   |

Module/Topic

### **Task Description**

Assessment Task 1: Multi-Choice Quizzes

There are 10 Multi-Choice Quizzes based on weekly readings from the assigned text book. Quizzes will be available on the Moodle website and remain open until Week 12. Students will be allowed a

maximum of 60 minutes and 2 attempts to complete each quiz. The highest score will be recorded for grading. Please note that the results from all 10 quizzes contributes to the overall mark of 20%.

# 2 Written Assignment

### **Assessment Type**

Written Assessment

#### **Task Description**

Written Assignment contributes to the overall mark of 30%

Students are required to develop a Unit plan and a project suitable for a Year 7-10 student cohort in a Woodwork Classroom.

The assignment will consist of:

Rationale for the Project

What Year Level the project is targeting

An accurate Dimension Working Drawing of the Project

A Detailed Work Procedure

A Criteria Sheet

There are examples of the Written Assignment on the Moodle page.

### **Assessment Due Date**

Week 12 Friday (11 Oct 2019) 5:00 pm AEST

#### **Return Date to Students**

Exam Week Monday (21 Oct 2019)

### Weighting

30%

#### **Assessment Criteria**

Written Assignment: The following criteria will be used. further details will be supplied on Moodle.

- · Ability to present graphical information
- · Ability to express and develop an idea
- Ability to present work effectively

## **Referencing Style**

• American Psychological Association 6th Edition (APA 6th edition)

### **Submission**

Online

## **Learning Outcomes Assessed**

- Apply theories of using timber as a renewable resource and the technological processes used to produce timberbased materials underpinning the content of middle years Industrial Technology and Design teaching
- Investigate how to plan, sequence, implement and assess timber materials used in the production of projects incorporated in the middle years industrial technology and design teaching area
- Recognise and apply basic skills sequences and procedures using design processes required for teaching timber technologies to school students in Years 7-10
- Critically evaluate specific applications of tools and equipment used in the production of timber technologies in the Middle Years of Learning
- Apply Occupational Health and Safety legislation in the school work place
- Analyse preferred implementation processes for the design of timber technologies through sequenced processes
- Demonstrate a professional capacity to communicate, work and learn, individually and in peer learning teams.

### **Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Cross Cultural Competence

# 3 Compulsory Residential School

### **Assessment Type**

**Practical Assessment** 

#### **Task Description**

The Compulsory Residential School introduces students to wood projects which target the junior year levels. Students will be using hand tools, machinery and equipment to fabricate five projects. The Compulsory Residential School provides students the opportunity to develop their hand skills, knowledge and understanding of workshop procedures and processes.

#### **Assessment Due Date**

Week 10 Wednesday (25 Sept 2019) 5:00 pm AEST

#### **Return Date to Students**

Exam Week Monday (21 Oct 2019)

## Weighting

50%

#### **Assessment Criteria**

Students will be assessed on the quality and presentation of their five projects, in addition to their knowledge and understanding of the application of workshop processes and their ability to work independently with limited assistance.

## **Referencing Style**

• American Psychological Association 6th Edition (APA 6th edition)

#### **Submission**

Offline

## **Learning Outcomes Assessed**

- Apply theories of using timber as a renewable resource and the technological processes used to produce timberbased materials underpinning the content of middle years Industrial Technology and Design teaching

# **Academic Integrity Statement**

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

## What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

## Where can I get assistance?

For academic advice and guidance, the <u>Academic Learning Centre (ALC)</u> can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### **Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

## **Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
