General Information

Overview
This unit provides an introduction to product design and development using a major natural resource, timber. It includes graphical design processes and occupational health and safety considerations in the demonstration of practical and theoretical knowledge and skills that are necessary to teach Industrial Technology and Design in the middle years of schooling (7-10). Knowledge and understanding of timber as a renewable natural resource, and its use in production processes will be gained through working with industrial machinery, digital and hand tool technologies. Students will plan learning experiences, design, develop, adapt and evaluate projects utilising critical aspects of knowledge about timber, and develop hands-on skills of working with timber-based materials.
